TITLE	State Postsecondary Education Profiles Handbook. 1981 Edition.
INSTITUTION	Education Commission of the States, Denver, Colo. Dept. of Postsecondary Education.; National Center for Higher Education Management Systems, Boulder, Colo.; State Higher Education Executive Officers Association.
REPORT NO	ECS-88
PUB DATE	Dec 81
NOTE	295p.; Not available in paper copy due to small print.
AVAILABLE FROM	State Services Division, Education Commission of the States, 1860 Lincoln Street, Suite 300, Denver, CO 80295 ($15.00).
EDRS PRICE	MF01 Plus Postage. PC Not Available from EDRS.
DESCRIPTORS	Annual Reports; Enrollment Trends; Expenditures; Governance; Governing Boards; Government School Relationship; *Higher Education; *Institutional Characteristics; Local Government; Master Plans; Operating Expenses; Population Trends; *Postsecondary Education; Private Financial Support; *Profiles; Public Support; School Business Relationship; State Agencies; State Government; Student Costs; Teacher Characteristics; Tuition

ABSTRACT

The sixth edition of the "State Postsecondary Education Profiles Handbook" presents information about postsecondary education in the 50 U.S. states and the District of Columbia. Part I offers a narrative description of the state-level coordinating or governing agency, institutional governing boards, current master planning activities, the 1202 commission, state student assistance agency or agencies, the state board of vocational education, the state-level organization for private colleges, the state licensure or approval agencies, voluntary or statutory committees for articulation between elementary-secondary and postsecondary education, nongovernmental organizations whose membership includes both public and private institutions (if staffed and with programs) and statutory advisory committees or task forces. Part II contains descriptive statistics including 1979 information about the state population and trends, state and local financial base, state and local governmental spending, state and local spending on higher education, institutional revenues and expenditures, enrollment trends, faculty characteristics, and student tuition and fees. Part III, Section A contains a listing of the annual and biennial reports published by state agencies that are available for distribution. Part III, Section B contains recently published special reports and studies and includes for each report the title, publication date, availability, and agency requesting and completing the report, and major issues covered. Part IV lists special reports and studies currently underway or being planned. Appendices include: data sources and references for Part II descriptive statistics; Part II summary tables; a list of State Higher Education Executive Officers (SHEEO); and the national associations representing other state agencies described in Part I. INTRODUCTION

The sixth edition of the State Postsecondary Education Profiles Handbook presents information about postsecondary education in the 50 states and the District of Columbia. The handbook is published annually and is cosponsored by:

Education Commission of the States (ECS)

National Center for Higher Education Management Systems (NCHEMS)

State Higher Education Executive Officers Association (SHEEO)

Information about each state is organized into four main parts as follows:

Part I: Narrative description of the state-level coordinating or governing agency, institutional governing boards, current master planning activities, the 1202 commission, state student assistance agency or agencies, the state board of vocational education, the state-level organization for private colleges, the state licensure or approval agencies, voluntary or statutory committees for articulation between elementary-secondary and postsecondary education, nongovernmental organizations whose membership includes both public and private institutions (if staffed and with programs) and statutory advisory committees or task forces.

Part II: Descriptive statistics including 1979 information about the state population and trends, state and local financial base, state and local governmental spending, state and local spending on higher education, institutional revenues and expenditures, enrollment trends, faculty characteristics and student tuition and fees.

Part III: Section A contains a listing of the annual and biennial reports published by state agencies that are available for distribution. Section B contains recently published special reports and studies and includes for each report the title, publication date, availability, the agency requesting and completing the report and major issues covered in the report.

Part IV: Lists special reports and studies currently underway or being planned. This part contains the same information as Part III-B above.

The editors call to the attention of the user of this handbook a special cautionary note on the statistical information reported for each state in Part II. This note appears on page vi.

Acknowledgements

Overall development, production coordination and final editing of the Profiles Handbook was under the supervision of Nancy M. Berve, ECS Coordinator, Postsecondary Education, State Services Division. Responsibility for the compilation of the information in Part I and followup verification by each state and collection of the information for Parts III and IV was assumed by Miss Berve with the assistance of Adrienne Sack, senior staff assistant, who coordinated the typing (and performed the major portion for Parts I, III and IV), proofing and putting together of the camera-ready copy of the handbook and Melodye Bush. The descriptive materials and tables in Part II were developed and coordinated for NCHEMS by Dave Makowski, senior associate; David Dvorkin, programming consultant; Kaye Kriz and Barbara Epp, staff associates. Fran Huth assembled Part II and related summary tables.

1981 Edition

A CAUTIONARY NOTE ON THE STATISTICAL INFORMATION REPORTED FOR EACH STATE

There are a number of important limitations to these data that states are asked to keep in mind as they review and use this information:

- State and Local Expenditures - 1978-79 - Table III

  Information about state and local governmental spending on higher education is reported in Tables III and IV. The data source for these two tables differ however (Census of Governments was used in Table III and the National Center for Education Statistics (NCES) - HEGIS series was used in Table IV). Because the numbers from these two sources are not comparable, the two sets of figures should not be compared. The finance information in Table III (Census) includes both operating and capital expenditures, whereas the financial data in Table IV (HEGIS) contains only operating expenditures.

- General Institutional Appropriations - 1978-79 - Table IV

  This figure includes dollars from state and local sources for educational and general appropriations. These figures exclude state and local contracts and grants. Tuition and fees collected by the institution and returned to the institution in the form of appropriations (that is, reappropriated tuition and fees) should have been subtracted as they are already reported under tuition and fees.

  While the state and local support of higher education in Table IV is shown on a per student basis for comparison purposes, it should be noted that these support dollars do support non-student related expenditures such as research, agricultural experiment stations, and hospitals, among others.

- Student Enrollments - 1978-79 - Table IV

  The HEGIS fall enrollment survey does not establish a standard definition for "full-time equivalent student." To the extent that institutions use different formulas, their FTE enrollment data lack comparability. And since FTE enrollment is used as a denominator for so many indexes in this study, lack of comparability is a serious problem. However, it is believed that most institutions use similar bases for determining FTE enrollment, thereby reducing the likely seriousness of these inconsistencies.

  Further problems are caused by the fact that not all institutions count enrollments on the same calendar date. Also the enrollment count is for the fall term and not the entire year. In contrast, finance data covers the entire fiscal year. Institutions with low attrition and/or large numbers of summer students will therefore have per student amounts that are overstated relative to other institutions with opposite situations. Finally, the financial data reflect non-credit instructional and other expenditures, however matching non-credit enrollments are not reported.

- Student Financial Aid - 1978-79 - Table IV

The state student financial aid reported in Table IV was based on data compiled by Jane Ryland for the joint project, *Report of the Ad-Hoc Task Force on the Quality and Comparability of HEGIS Finance Data*, (Boulder, CO: SHEEO/NCES Communications Network, 1980). These data are also used by NCHEMS and NIE in the FY 1979 edition of *Higher Education Financing in the Fifty States*.

- Institutional Revenues - 1978-79 - Table V

Educational and general revenues are defined to *include* tuition and fees; governmental appropriations; government grants and contracts; private gifts, grants and contracts; endowment income; sales and service of educational activities and other sources. It *excludes* revenues from sales and services of auxiliary enterprises, sales and services of hospitals, and independent operations.

- Institutional Expenditures - 1978-79 - Table VI

Educational and general expenditures include current fund expenditures for instruction, research, public service, academic support, student services, institutional support, operation and maintenance of plant, scholarships and fellowships, and educational and general mandatory transfers. Educational and general expenditures *excludes* expenditures for auxiliary enterprises, sales and services of hospitals, and independent operations.

- Faculty Characteristics - 1979-80 - Table VI

The data reported are for full-time instructional faculty only. Part-time faculty are *not* included. Staff benefits are also *excluded*.

- Inclusion of Institutions

The extent to which the HEGIS surveys include public vocational-technical institutions that are postsecondary in nature varies among the states. For those states where they are omitted, both enrollments and state appropriations are likely to be underreported. In addition, in some states these institutions are included but only a part of their enrollments and finances are reported.

- Treatment of Central Administration Costs

Revenues and expenditures for administration at campus system offices are included in the finances for the parent institution. In states where a similar function is provided by a state postsecondary commission, similar administrative costs are *not* included. As a result, revenues and expenditures for these latter systems are somewhat understated.

- Use of "Campus" Versus "System" as the Reporting Unit

In this study, some campuses are classified separately rather than as part of the parent institution. If the HEGIS file showed separate data for a campus, then it was treated as a unique institution and classified on the basis of the degrees data it reported. If the campus was not separately identified (on the computer tape), then its data were reported as part of the parent institution and cannot be separately identified. Because different campuses of a system may specialize their degree offerings, they often are classified in a different category than the parent institution.

A special variation of this problem occurs for health professional programs. In 18 states, there are distinct financial and enrollment data associated with a comprehensive health institution. In 22 states, the health professional programs are part of an overall institution and health finances and enrollments are not separable. Because health programs are very costly, their inclusion in a system may cause some distortion in per student revenues and expenditures. In the state reports, asterisks are used to identify those institutional categories that contain a health professional program. See Appendix A.1 for a listing of states and institutions and their specific organizational arrangements.

- Varying Organizational Arrangements

Treatment of medical schools, central administration, the operation of extension and research institutes are all examples of activities that often vary in terms of their relationship to a main campus or system of campuses. To the extent that practices vary among different institutions, data comparability problems will exist.

- Finances for Hospitals, Auxiliary Enterprises, and Independent Operations

Revenues and expenditures from sales and service operations of hospitals, auxiliary enterprises, and independent operations have been excluded from this study. It is not possible at this time to isolate the extent that state and local appropriations are used, if at all, to support these functions. For the institutions where appropriations are used for these purposes, E&G finances per student will be understated in this report.

- Debt Service

In some states, the capital costs of physical facilities are financed through a separate state agency. In other states debt service is paid for with current funds. For these latter institutions, the finances will be overstated for comparison purposes.

- Chargebacks

For some large university systems, a single campus may provide services to other campuses. If some form of chargeback system is not used, then the finances for the campus providing the service will be overstated. Finances for the campuses receiving services will be understated.

- Geographical Price Adjustments

  No attempt has been made in this study (except in the limited analysis in Appendix C) to adjust dollar values for differences among states in the prices paid for equivalent goods and services for higher education. Geographical price differences do exist and they are substantial, ranging from perhaps as high as 30 to 40 percent above the national average in Alaska to 15 to 20 percent below the average in certain non-metropolitan areas of the country. To establish common purchasing power for interstate comparisons, such price differences should be taken into account. However, measures of this type for any public service are not currently available.

- Employee Benefits

  State payments for employee benefits do not always flow through institutional accounts. In some states they are made directly by the state to a separate agency handling such funds. While their value should be imputed and reported, it is unclear whether all institutions follow this convention.

- Variances in Public Service

  Institutions vary in the types of public service activities they engage in. To many states, a variety of state agencies that are not postsecondary in nature may be providing these activities, such as public hygiene, indigent patient care, hygiene research, etc. Clarification about the specific categories of public service activities conducted would aid comparability among the states.

For more information about the specific sources and the intended purposes of the statistics enclosed, refer to Appendix A.1.

While the types of cautionary comments included above are significant, the data are being published in this Handbook in the belief that they still represent the best information that is currently available on a national basis.

ALABAMA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Commission on Higher Education, the statutory coordinating agency for public higher education, was established in 1969. The commission is composed of 12 members, ten of whom are appointed by the governor and one each by the lieutenant governor and speaker of the house, and all are subject to confirmation by the senate. No more than two members can be from any one congressional district and each is charged with representing the state as a whole. Each serves a nine-year term of office. The statutory authority of the commission includes planning, coordination, budget review for individual institutions and recommendation of a consolidated budget and program review for the state's public senior and junior institutions. The commission is not a cabinet department. The executive officer of the agency is appointed by and serves at the pleasure of the commission and is subject to reconfirmation by the senate every four years.

Institutional Governing Boards

The state has two multicampus governing boards established by the state constitution with powers delineated by the state legislature -- the Board of Trustees of the University of Alabama for three senior institutions and the Board of Trustees of Auburn University for two senior institutions. Each of eight other state universities has a separate governing board and one upper-division college, 15 junior colleges, six community colleges and 22 technical colleges or institutes that are governed by the State Board of Education.

Master Planning

A second master plan for the period 1980-85 is currently under development. This version will contain several specific structural reorganization recommendations as well as programmatic studies and role and scope statements for all institutions.

1202 Commission

In October 1976, the Commission on Higher Education was designated by the governor as the 1202 commission.

State Student Assistance and Loan Agencies

A state student assistance program was established in 1975 and is administered by the Commission on Higher Education. The state participates in the federal grant program for direct assistance to resident students of certain private institutions in the state. Additionally, legislation was passed in May 1980 to authorize the establishment of a guaranteed student loan program to be administered by the commission.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Council for the Advancement of Private Colleges in Alabama and the Alabama Association of Independent Colleges and Universities serve as state-level organizations representing 19 private colleges and universities within the state.

Licensure/Approval Agencies

The State Department of Education has approval/licensing authority for vocational-technical schools, nondegree-granting proprietary schools and nonaccredited degree-granting institutions.

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Commission on Postsecondary Education was established by statute in 1974 as the coordinating agency for all postsecondary institutions and programs. There are 13 members of the commission: 2 members from the legislature, 2 members from the regents of the University of Alaska, 1 member from the governing body of a private institution, 1 member representing the State Board of Education, 1 member from the State Advisory Council on Vocational Education, 1 member representing the State Advisory Council on Community Colleges and 5 members broadly and equitably representative of the general public. The 5 general public members are appointed by the governor with approval of the legislature and the other 8 members are designated by their respective agencies.

The commission's responsibilities include: (1) authority to coordinate the development of comprehensive plans for the orderly systematic growth of public and private postsecondary education, including community colleges and occupational education, and to submit recommendations on the need for and location of new facilities and programs; (2) advisory services to the governor, the legislature, other state and federal officials and to the governing boards of public and private institutions of higher education; (3) authority to review and comment on the annual budgets and capital outlay requests of the public university and the private colleges; (4) to function as state agency for appropriate sections and titles of the Higher Education Act of 1965; and (5) to serve as adjudicator when necessary in consortium agreements. The commission is not a cabinet department and its executive officer is appointed by and serves at the pleasure of the commission.

Institutional Governing Boards

The University of Alaska, established in 1917, is the single public institution of higher education in the state. The Board of Regents, constitutionally founded, consists of 11 members appointed by the governor and approved by the legislature, 10 of which serve eight-year terms and 1, a student, serves for two years. The board has statutory authority for all segments of the university system including 3 main campus locations, 10 community colleges and outreach programs.

Master Planning

The Commission on Postsecondary Education is statutorily required to develop a comprehensive statewide plan for coordinated postsecondary education in Alaska.

1202 Commission

The Commission on Postsecondary Education is designated by statute as the state 1202 commission.

State Student Assistance and Loan Agencies

The Alaska student loan program, the WICHE student exchange and graduate fellows programs and the State Education Incentive Grant program are administered by the Commission on Postsecondary Education.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education. The Commission on Postsecondary Education has statutory authority for planning of postsecondary vocational education. The state's community colleges offering vocational education programs are under the authority of the Board of Regents.

State-Level Organization of Private Colleges and Universities

Alaska has three private postsecondary institutions and there is no state organization of private institutions.

Licensure/Approval Agencies

The Commission on Postsecondary Education has licensure and approval authority for all institutions of postsecondary education and for approval of all programs and institutions enrolling students receiving veteran's benefits.

Statutory Advisory Committee and/or Task Forces

Although there are no advisory committees to the state-level agency established by statute, the Commission on Postsecondary Education has statutory authority to establish any such committees to advise and assist the commission in carrying out its assigned functions. The standing committees of the commission presently include the executive committee, the community college advisory committee, and committees on student financial aid, institutional authorization and planning.

PART II: DESCRIPTIVE STATISTICS

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

There are 2 statewide boards in Arizona for public-supported institutions -- 1 for the universities and 1 for community colleges. The Arizona Board of Regents was created to govern the universities in 1945. The board is composed of 11 members, 8 appointed by the governor with the consent of the state senate, who serve for 8 years; and a nonvoting student member who serves a one-year term. The governor and state superintendent of public instruction serve as ex officio members. The regents have jurisdiction, control and broad general administrative powers as provided by the state constitution and statutes. Its responsibilities include coordination, planning, budget review and approval and program approval as well as other functions. Although the board is not a formal cabinet department, a close coordinating relationship between the governor's office and the major state government department heads is maintained through frequent planning sessions. The executive director of the Board of Regents represents the universities at these meetings.

The State Board of Directors for Community Colleges is the statutory statewide coordinating board for the 9 public-supported community college districts. The board is composed of 17 members, 14 appointed by the governor and 3 ex officio members. The board has statutory authority for planning, coordination, budget review and recommendations and program approval for the community colleges. The 27 community college campuses operate under 9 community college district governing boards.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

There is no total statewide master plan for higher education in Arizona. Planning is a major responsibility of each governing board and the Board of Regents. Plans are coordinated with the executive branch and the legislature but are not approved by them.

1202 Commission

The Commission on Postsecondary Education was created by executive order to assume the planning responsibilities under Section 1202 and 1203 of the Education Amendments of 1972 and to administer other assigned programs. The commission is composed of 14 members appointed by the governor: 4 representative of the general public, 7 representative of public institutions, and 1 representative each from private/nonprofit institutions proprietary institutions and vocational-technical institutions, and the executive director of the Board of Regents as an ex officio member.

State Student Assistance and Loan Agencies

Legislation has been adopted to permit direct state appropriations for matching federal state student incentive grant funds.

State Board of Vocational Education

The State Board of Education serves as the State Board of Vocational Education. In Arizona all less-than-baccalaureate programs are under governing boards for institutions of higher education. However, to the extent that any of these are occupational programs offered by institutions designated as area vocational schools, these programs are under the supervision of the State Board of Education.

State-Level Organization of Private Colleges and Universities

The private colleges in Arizona do not have a state-level organization.

Licensure/Approval Agencies

The State Board of Private Technical and Business Schools has approval and licensing authority over vocational-technical and proprietary schools. The board has seven members appointed by the governor and the superintendent of public instruction ex officio. There is no state agency for licensing or approval of private degree-granting academic institutions. State statutes do require that all corporations, whether profit or nonprofit, register and comply with the rules and regulations of the Arizona Corporation Commission.

Master plan for Disposition of University Agriculture Properties	March 1981	No	Board of Regents	Board of Regents	Development, sale, or use of property no longer needed for agriculture programs.

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Arkansas Department of Higher Education, established in 1971, functions as a statutory cabinet department of state government charged with the coordination of postsecondary education in Arkansas. The department replaced the Commission on Coordination of Higher Educational Finance which was established in 1962. The State Board of Higher Education, the coordinating board for the department, is composed of ten lay members appointed by the governor and confirmed by the senate. Each member serves a ten-year term of office. The department has statutory responsibility for planning and coordination for public junior and senior institutions, except in vocational-technical fields which are the responsibility of the Division of Vocational and Technical Education in the Department of Education, and consideration is given to independent and proprietary postsecondary schools within this planning. The department has statutory responsibility for budget review and recommendations and program review and recommendations for the public junior (except in vocational-technical fields) and senior institutions. The executive officers of the agency is nominated by the board, confirmed by the governor, and serves at the pleasure of the governor.

Institutional Governing Boards

Arkansas has six governing boards for public senior institutions which are constitutional boards with powers delineated in the constitution. The University of Arkansas board, the Southern Arkansas University board, and the Arkansas State University board are responsible for more than one campus and the other boards each govern a single institution. These boards range in number of members from five to ten and all are appointed by the governor and confirmed by the senate. The six community colleges each have local boards consisting of nine members elected from within the taxing district.

Master Planning

The most recent master plan was completed in 1978. There are no plans for a major update or revision during the 1981-82 fiscal year.

1202 Commission

In April 1974, the Postsecondary Education Planning Commission was created as the 1202 commission by executive order. The 1975 General Assembly confirmed the creation of this commission by legislative act. The commission is the existing State Board of Higher Education augmented by five members to represent the general public, public vocational-technical institutions and independent institutions.

State Student Assistance and Loan Agencies

The Arkansas Department of Higher Education administers the state scholarship program and Arkansas participates in the federal state student incentive grant program. In addition, Arkansas has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education serves as the State Board for Vocational Education. Legislation passed by the General Assembly in 1981 created two divisions within the Department of Education -- the Division of General Education and the Division of Vocational and Technical Education -- each headed by a director and each reporting directly to the State Board of Education. The Division of Vocational-Technical Education operates 24 postsecondary vocational-technical schools and is responsible for program and budget coordination of all vocational-technical programs at all levels.

State-Level Organization of Private Colleges and Universities

The Arkansas Council of Independent Colleges and Universities serves as the state-level organization for 12 independent colleges and universities.

Licensure/Approval Agencies

The Arkansas Department of Higher Education has licensing and approval responsibility for college credit and degrees granted by out-of-state, private and proprietary institutions. The Department of Education has licensing and approval responsibility for vocational-technical schools and nondegree granting proprietary schools.

CALIFORNIA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

On April 1, 1974, the California Postsecondary Commission assumed the budget and staff of the Coordinating Council for Higher Education, but the commission's duties and powers were somewhat greater than those assigned to its predecessor. The commission is not a regulatory agency or governing board. Rather, it serves as advisor to the legislature, governor and postsecondary institutions concerning major educational policies. It is required to establish a statewide data base with extensive information from all institutions, public and private. The commission has statutory authority to review institutional budgets, to advise on the need for and location of new campuses, and to review all new program proposals in the public segments. The commission's primary purpose is to prevent unnecessary duplication and to coordinate efforts among the educational segments. The commission's efforts are directed by its five-year plan which sets out educational goals and statewide issues, particularly those that concern large numbers of colleges, universities and proprietary schools.

The commission is composed of 23 members: 6 represent the public institutions, 2 represent the private colleges and universities, and one each represents the California Advisory Council on Vocational Education, the Council for Private Postsecondary Educational Institutions and the State Board of Education. Additionally, 12 members are appointed from the general public: 4 by the governor, 4 by the Senate Rules Committee, and 4 by the Assembly's speaker. California does not have a state office of secretary of education and the commission is not a cabinet department. The executive officer is appointed by the commission and serves at its pleasure.

Institutional Governing Boards

Institutional governing boards in the state include: (1) The Board of Regents of the University of California, exercising constitutional powers over 9 public senior colleges, 3 research laboratories and numerous agricultural extension stations; (2) the Board of Trustees of the California State University and Colleges, exercising statutory authority over 19 public senior colleges and the consortium; and (3) 70 local community college district Boards of Trustees responsible for governing the 107 public two-year colleges. General direction and leadership is provided at the state level by the Board of Governors of the California Community Colleges.

Master Planning

The 1973 California legislature charged the Postsecondary Education Commission with a number of significant responsibilities relating to planning and coordination of all segments of postsecondary education. By statute, the commission is charged with integrating the individual segmental plans into a statewide five-year plan for postsecondary education. The plan is updated annually.

1202 Commission

The California Postsecondary Education Commission has been designated by statute as the 1202 commission for California.

State Student Assistance and Loan Agencies

The California Student Aid Commission administers student scholarship and grant programs. The commission has established a state student loan guarantee agency for the federal guaranteed student loan program pursuant to the Education Amendments of 1976. California participates in the federal state student incentive grant program.

State Board of Vocational Education

In California, the State Board of Education has been designated by the Federal Government as the State Board of Vocational Education. Most responsibilities, however, are executed by a Joint Committee on Vocational Education which has equal representation from both the Board of Education and from the Board of Governors of the California Community Colleges.

State-Level Organization of Private Colleges and Universities

The Association of Independent California Colleges and Universities (AICCU) represents 57 of the 310 independent colleges and universities in the state. All member institutions of the AICCU are regionally accredited.

Licensure/Approval Agencies

The State Department of Education, Office of Private Postsecondary Education, through the superintendent of public instruction, has approval and licensing authority for both degree granting and nondegree granting postsecondary programs, schools, colleges and universities within the state.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

A voluntary Articulation Conference, with an administrative committee, is composed of secondary school personnel, and representatives of the various segments of postsecondary education and of the Postsecondary Education Commission. In addition to an annual statewide meeting, committees operate in special interest areas throughout the year.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

The California Community/Junior College Association includes both public and independent institutions. However, inasmuch as there are few independent two-year colleges in the state, the association is oriented primarily toward public institutions.

PART I: STATE STRUCTURE (CONTINUED)

Statutory Advisory Committees and/or Task Forces

A 7-member committee, advisory to the Postsecondary Education Commission and its director, was created by the enabling statute which created the Postsecondary Education Commission. The members include the chief executive officers, or designees of the University of California, the California State University and Colleges, the California Community Colleges; the superintendent of public instruction or his designee, and an executive officer from the independent colleges and universities, and the Council for Private Postsecondary Educational Institutions.

*California Postsecondary Education Commission

COLORADO

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Commission on Higher Education is the statutory agency for planning and coordination of higher education in Colorado. The commission was established in 1965 and its responsibilities were amended in 1970. The commission consists of 9 public members appointed by the governor with the consent of the senate, each with four-year terms. Among its responsibilities are to (1) review individual institutional budgets for consistency with state plans and institutional roles, and present its comments and recommendations thereon to the governor and legislature; (2) review and approve new program proposals, review and recommend to governing boards and legislature as to costs of existing and proposed nondegree programs, recommend to governing boards programs to be eliminated or consolidated and develop a unified program of extension offerings; (3) recommend to the governor and legislature sites for and establishment of new public institutions; (4) prescribe uniform standards for development of capital construction programs, review and approve program plans for capital construction projects and recommend capital construction priorities to the legislature, state budget office and governor; (5) recommend to governing boards roles and functions of public institutions; (6) make statistical and other higher education studies; and (7) seek cooperation and advice of public and private institutions in the state. The executive director is appointed by the commission and serves at its pleasure. He also serves as a member of the governor's cabinet, where he is by statute the executive director of the Department of Higher Education, comprising the commission, the state's public institutions of higher education, the State Historical Society, the Council for the Arts and Humanities and the Colorado Student Loan Guarantee Division.

Institutional Governing Boards

Colorado's public institutions of higher education are under the direction of 6 governing boards. The regents of the University of Colorado (the only publicly elected governing board) are responsible for the operations of the university on its four campuses in Boulder, Colorado Springs, Denver (Auraria) and at the Health Sciences Center in Denver. The State Board of Agriculture serves as the governing board for the state's land-grant institution—Colorado State University—located in Fort Collins, for the University of Southern Colorado in Pueblo and for Fort Lewis College in Durango. The Colorado School of Mines and the University of Northern Colorado each has its own Board of Trustees. The Trustees of the State Colleges and University Consortium are charged with the governance of 4 institutions: Adams State College in Alamosa, Mesa College in Grand Junction, Metropolitan State College in Denver and Western State College in Gunnison. The 7 institutions comprising the state system of community colleges are under the control of the State Board for Community Colleges and Occupational Education, which also serves as the state's board for vocational education, and has oversight for much of the programming of the state's 4 local district colleges and 22 area vocational schools. This board also serves as the state approving agency for veterans' programs, and for some 67 private vocational schools authorized to operate at over 70 locations in Colorado. In addition, a Board of Directors of the Auraria Higher Education Center has certain special responsibilities with respect to nonacademic programming at the University of Colorado-Denver, Metropolitan State College and the Community College of Denver-Auraria.

Master Planning

The Commission on Higher Education has responsibility to develop and maintain a comprehensive plan for public higher education in Colorado in consideration of the needs of the state, the role of individual public and private institutions and the state's ability to support higher education. In fulfillment of this responsibility, the commission completed and presented to the legislature in February 1978 a Master Plan for Higher Education entitled, A Plan and a Process for Postsecondary Education in Colorado, 1978-79 Through 1982-83: Access and Quality. A progress report was made to the legislature in 1979 and an updated edition of the plan was issued in February 1980.

1202 Commission

Effective July 1, 1977 the Colorado Commission on Higher Education, augmented by its Advisory Committee, was designated by executive order as the Colorado State 1202 Commission. The future of the 1202 commission is uncertain, pending federal legislation and appropriations.

State Student Assistance and Loan Agencies

The Commission on Higher Education administers the Colorado work-study program and several programs of state-funded grant assistance provided by legislative appropriations for students attending public institutions. The state participates in the federal state student incentive grant program and provides assistance to students attending public, private and private vocational colleges and schools in Colorado through that program. The Colorado Guaranteed Student Loan Program became effective on February 15, 1980.

State Board of Vocational Education

The State Board for Community Colleges and Occupational Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The regionally accredited private colleges and universities in the state do not have a state-level organization.

Licensure/Approval Agencies

The Commission on Higher Education administers the statute applying to the awarding of degrees by private institutions. No approval or licensing authority is conveyed by the law. Under the provisions of Colorado's Private Vocational School Act of 1975, the State Board

PART I: STATE STRUCTURE (CONTINUED)

for Community Colleges and Occupational Education serves as the approval agency for private vocational schools.

Statutory Advisory Committees and/or Task Forces

The commission's statutory advisory committee is composed of 15 members, 4 of whom represent the legislature; 6 represent governing boards of the public institutions; and the other 5 members are appointed by the commission. The commission's appointees include a representative of the commissioner of education, representatives of the higher education faculties, the private sector, proprietary schools and a student representative. The committee was established for the purpose of suggesting solutions for the problems and needs of higher education and maintaining liaison with the legislature and the governing boards.

CONNECTICUT

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Connecticut Board of Higher Education was established in 1977 as a successor to the Commission for Higher Education. The commission, established in 1965, had planning, coordinating and regulatory responsibilities. Additional duties were mandated for the board, including the establishment of statewide policy, the preparation of a consolidated budget request and the development of a central information system for public higher education. The board consists of twenty-one members. Twelve are public members appointed for six-year terms. Of these, six are appointed by the governor, two are appointed by the senate president pro tem, one by the senate minority leader, two by the speaker of the house, and one by the house minority leader. Five are appointed for two-year terms as representatives of the five constituent unit boards of trustees: the University of Connecticut, the State Colleges, the Regional Community Colleges, the State Technical Colleges and the Board for State Academic Awards. One member is appointed as a representative of the private occupational schools and one is appointed as a representative of the Connecticut Conference of Independent Colleges. One student member is elected for a two-year term alternately by the students or their representatives at the University and the State Colleges. One student member is elected for a one-year term alternately by the students or their elected representatives of the technical colleges and the community colleges. The Commissioner of Education is also a board member ex officio. The chief executive officer is appointed by the board and serves at its pleasure.

Institutional Governing Boards

There are 5 statutory governing boards in Connecticut: (1) the Board of Trustees of the University of Connecticut, responsible for the state's land-grant university, medical center and 5 branch campuses; (2) the Board of Trustees of State Colleges responsible for 4 four-year state colleges; (3) the Board of Trustees of the Regional Community Colleges responsible for 12 two-year colleges; (4) the Board of Trustees of State Technical Colleges responsible for 5 two-year technical institutions; and (5) the Board for State Academic Awards, a nonteaching institution, which is empowered to certify credits and grant degrees as Charter Oak College.

Master Planning

A master plan was prepared in 1974 and updated in 1976. In 1978-79 the board prepared a plan for the restructuring of public higher education which was submitted to the General Assembly in September 1979 for 1980 legislative session. A planning report is scheduled for 1982.

1202 Commission

The Board of Higher Education has been designated by statute as the state's 1202 agency. Its membership is broadly representative of public and nonpublic postsecondary education; no supplemental membership has been required under federal regulations.

State Student Assistance and Loan Agencies

In 1981, the General Assembly amended the state's student financial assistance programs by eliminating the Student Financial Assistance Commission and giving the Board of Higher Education the authority to make policy for and operate student financial assistance programs. P.A. 81-157 creates the State Scholastic Achievement Grant Program to replace the state scholarship program.

The new legislation allows students to qualify for awards based on high school performance or performance on standardized aptitude tests and does not allow awards to be taken out of state unless the institution attended is in a state which allows students to bring awards to Connecticut. Out-of-state awards are limited to $500, in-state awards to $1,500. The legislation also raises the maximum award under the State Supplemental Grant and State Work Study Programs to $1,500 and allows institutions to use up to 10 percent of the funds for these programs for graduate students.

The Board of Higher Education is required to develop regulations for the State Scholastic Achievement Grant Program and to appoint an advisory committee.

State Board of Vocational Education

The State Board of Education serves as the State Board of Vocational Education. The chief executive officer of the Board of Higher Education serves as an ex officio. The board also has responsibility for special education, vocational and adult education. Some of these interests fall within the coordination and planning jurisdiction of the Board of Higher Education and there is some sharing of responsibility for less-than-baccalaureate programs. Higher education is represented on the state Sec. 108 Advisory Committee.

State-Level Organization of Private Colleges and Universities

The Connecticut Conference of Independent Colleges serves as the state-level organization for 19 independent colleges and universities within the state.

Licensure/Approval Agencies

The Board of Higher Education has licensing and program approval authority for public and independent degree-granting institutions of higher education as well as for private post-secondary proprietary vocational or technical schools which qualify for degree-granting status.

Statutory Advisory Committees and/or Task Forces

A mandated Faculty Advisory Council consisting of fourteen members is elected by faculty of the constituent units for two-year terms. Four members each are elected by the university, the state colleges and the regional community colleges. Two members are elected by the state

PART I: STATE STRUCTURE (CONTINUED)

technical colleges. An advisory council advises the commissioner on current issues including business and industry relationships, public/private coordination and nontraditional and external degree programs.

Statutory Advisory Committees and/or Task Forces

The Board of Higher Education has statutory authority to establish advisory committees related to other responsibilities.

*Board of Higher Education

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The State of Delaware does not have a constitutional or statutory statewide agency for higher education.

Institutional Governing Boards

There are 3 institutional governing boards in the state: (1) the Board of Trustees of the University of Delaware, with statutory responsibility for 1 public senior college; (2) the Board of Trustees of Delaware State College, with constitutional authority for 1 public senior college, and (3) the Board of Trustees of Delaware Technical and Community Colleges, with statutory authority over 4 public junior colleges.

Master Planning

As noted below, the 1202 commission conducts planning for all postsecondary education in Delaware. No master plan has as yet been developed.

1202 Commission

The Delaware Postsecondary Education Commission, established by executive order in 1974 and revised by executive order in 1977, serves as the 1202 commission in the state. The commission consists of 14 members: 8 voting members representing the general public and 6 ex officio members -- 3 representing public institutions and 1 each representing private, vocational-technical institutions and proprietary institutions. The commission is not a cabinet department and the executive officer is appointed by the commission and serves at its pleasure. The commission conducts planning as a matter of policy for all public senior and junior colleges, public vocational-technical schools and private institutions.

State Student Assistance and Loan Agencies

The Delaware Postsecondary Education Commission, serves as the state student aid agency and Delaware participates in the federal state student incentive grant program. Delaware has a state guaranteed loan program administered separately as the Delaware Higher Education Loan Program.

State Board of Vocational Education

The State Board of Education serves as the State Board of Vocational Education. In Delaware all less-than-baccalaureate occupational education programs are supervised by the postsecondary governing boards and no such programs appear to be under the State Board of Education. To the extent that any of the less-than-baccalaureate programs are offered by institutions designated as area vocational schools, these institutions are under the supervision of the state board and responsibility is divided between the governing board and the State Board of Education.

State-Level Organization for Private Colleges and Universities

Delaware has a state-level organization for private institutions within the state. The Delaware Association of Independent Colleges was established in 1977.

Licensure/Approval Agencies

The State Department of Public Instruction serves as approval authority for all private degree-granting institutions and vocational-technical institutions. Proprietary schools (nondegree-granting) are approved by the State Board of Education through the Department of Public Instruction.

*Delaware Postsecondary Education Commission

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The University of the District of Columbia Board of Trustees governs the university, formed from a consolidation of the 3 existing public institutions of higher education, as authorized by Congress in the D.C. Public Postsecondary Education Reorganization Act in 1974, and ratified and amended by the D.C. City Council in 1975. Of the 15 members of the board, 11 are appointed by the mayor with advice and consent of the council, 3 are alumni members chosen by the University of the District of Columbia Alumni Association, 1 is a student, and the president of the university serves as an ex officio member. The term of the student member is for one year, and the terms of the other members are for five years, with initial terms staggered from two to five years.

The Educational Institution Licensure Commission is the state-level education department for supervising, monitoring and regulating all private educational institutions in the District. The commission provides the mayor and city council recommendations with respect to educational and vocational training needs of the District of Columbia.

The District does not have a designated office of secretary of education and the university's governing board does not serve as a cabinet department. The District has an Office of State Education Affairs within the Department of Human Services which performs some of the functions of a state education department and provides staff support to the 1202 commission.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

The Board of Trustees is required by its establishing legislation to prepare a long-range plan for the development of the university. A Master Consolidation Plan for the university was prepared in June 1978 and revised in July 1978. A five-year Master Plan, Part I, was adopted by the board in 1981 as the blueprint for the orderly development of the university through 1985. The Educational Institution Licensure Commission studies and reports on the educational and vocational training needs of the District of Columbia. The D.C. Commission on Postsecondary Education prepares studies of postsecondary education resources and makes recommendations concerning future changes and developments.

1202 Commission

The Commission on Postsecondary Education, established in 1974 by order of the District of Columbia mayor, is the District's 1202 commission. The commission has 24 members appointed by the mayor for terms of 1 to 3 years: 6 representatives of the general public, 3 representing the public university, 7 representing private nonprofit institutions, 2 from vocational and proprietary institutions, 2 students and 1 representative each from the city council, the District government, public schools and the D.C. Advisory Council on Vocational Education. The commission conducts planning and coordination for all segments of postsecondary education in the District -- public, private and proprietary. However, the Board of Trustees has direct planning responsibility for the university, and the commission can only make recommendations regarding the private and proprietary sectors. The executive officer of the commission is the chief of the District's Office of State Education Affairs.

State Student Assistance and Loan Agencies

The Office of State Education Affairs of the Department of Human Services, serves as the state student assistance agency and the District participates in the federal state student incentive grant program. The D.C. Guaranteed Student Loan Program has been suspended, although collection activities on past loans continue. The Higher Education Assistance Foundation began administering the D.C. Higher Education Assistance Foundation guaranteed student loan program in 1979.

State Board of Vocational Education

The D.C. Board of Education serves as the State Board of Vocational Education, with the D.C. Advisory Council on Vocational Education acting in an advisory capacity. A D.C. Vocational Education State Plan and Accountability Report Committee has been established in accordance with the Education Amendments of 1976.

State-Level Organization for Private Colleges and Universities

The District does not have an organization for the 17 private institutions. However, the Consortium of Universities of the Washington Metropolitan Area represents the interests of the 5 large private universities, the public university and 3 private colleges and has undertaken enrollment exchange activities, joint publication projects and on-going cooperative programs.

Licensure/Approval Agencies

The Educational Institution Licensure Commission was established pursuant to D.C. Law 1-104 to assume the approval and licensure authority formerly of the Board of Higher Education (passed on to its successor, the Board of Trustees, on a temporary basis). The commission will soon assume the responsibility for elementary and secondary schools, and all professional, technical and business schools. The commission has 5 members appointed by the mayor for 5-year terms, and has authority to license all private educational institutions and serve as the state approving agency for veterans' benefits and course approvals.

*District of Columbia Commission on Postsecondary Education

FLORIDA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The chief policy-making and governing body for public education in Florida is the State Board of Education. The board is composed of 7 persons each of whom serves in an ex officio capacity by virtue of the elected office he or she holds -- the governor, secretary of state, state treasurer, attorney general, commissioner of agriculture, state comptroller and commissioner of education -- and has constitutionally defined legal status. The board serves as a single governing board for all public education in the state and was established in 1885, with amendments to its structure and responsibilities in 1968. The State Board of Education has statutory responsibility for reviewing individual institutional budgets, general budgetary review and making consolidated budget recommendations for all public senior and junior institutions.

Institutional Governing Boards

Under the jurisdiction of the State Board of Education are the Board of Regents of the State University System, the Division of Community Colleges and the Community College Coordinating Board. The Board of Regents of the State University System was established in 1965, and governs the 9 public senior institutions under statutory authority. The Board of Regents consists of the Commissioner of Education and 12 other members including a full-time student. Members of the board are appointed by the governor with the approval of 3 cabinet members and consent of the senate. The board has statutory responsibility for planning, institutional budget review and consolidated budget recommendations and program approval for all public senior institutions. The executive officer of the board is appointed by the board and serves at the board's pleasure. The Division of Community Colleges has statutory responsibility for planning, institutional budget review and consolidated budget recommendations and program approval for all 28 public community colleges in the state. The Community College Coordinating Board, created in 1979, is responsible for establishing and developing rules and policies which will ensure the operation and maintenance of a State Community College System in a coordinated, efficient and effective manner. The board is comprised of 11 members, including the president of the Florida Junior College Association, the Student Government Association, appointed by the governor, approved by four members of the State Board of Education and confirmed by the senate.

1202 Commission

See Statutory Advisory Committees and/or Task Forces.

State Student Assistance and Loan Agencies

The state student assistance agency administers state programs under the State Department of Education. Florida participates in the federal state student incentive grant program and guaranteed federally insured loan programs.

State Board of Vocational Education

The State Board of Education is the State Board for Vocational Education.

State-Level Organization of Private Colleges and Universities

The Independent Colleges and Universities of Florida, Inc., serves as the state organization for 18 independent accredited colleges and universities within the state.

Licensure/Approval Agencies

The Board of Independent Colleges and Universities within the State Department of Education has approval and licensing authority for private degree-granting institutions. The Board of Postsecondary Vocational, Technical and Trade Schools has approval authority for all vocational-technical schools and proprietary schools within the state.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The Commissioner's Committee on Time-Shortened Education has responsibility for coordination, communication and articulation regarding time-shortened programs.

Statutory Advisory Committees and/or Task Forces

The Postsecondary Education Planning Commission, initially created by executive order in 1980 and subsequently given statutory authority, is designated as the 1202 Commission and serves as an advisory body to the State Board of Education on all postsecondary education matters. The commission is composed of 11 members of the general public and 1 full-time student registered at a postsecondary education institution in Florida. Members are appointed by the governor with the approval of three members of the cabinet and subject to confirmation by the senate.

---

*Postsecondary Education Planning Commission

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Regents of the University System of Georgia functions as the single governing board for all public higher education in the state. The board was established in 1931 and the structure and responsibility of the board was made constitutional in 1943. The regents consist of 15 members appointed by the governor with the consent of the senate. All members represent the general public and serve seven-year terms of office. The board has constitutional responsibility for planning and coordination, institutional budget review including recommendations for a consolidated budget and program approval over 15 public junior, 14 senior colleges and 4 university-level institutions. Georgia does not have a state office of secretary of education and the regents do not function as a cabinet department. The executive officer of the board is appointed by and serves at the pleasure of the board.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

The University System has not compiled a System-wide master planning document. Instead, various planning activities have been initiated which require evaluation and follow-up and are regarded as components of such a plan (e.g., five-year institutional reviews, development of academic program inventory, development of mission statements).

1202 Commission

The Georgia Governor's Committee on Postsecondary Education has been designated by the governor as the 1202 commission in the state. The Committee has 17 members, all appointed by the governor. Five members represent the general public, 3 represent public institutions, 2 represent private institutions, 1 represents proprietary institutions and 3 each represent vocational-technical education and a category labeled "other." In 1979, the committee began an assessment of goals and objectives for postsecondary education and has published several documents regarding its findings.

State Student Assistance and Loan Agencies

The Georgia Student Finance Commission serves as the state student aid agency and Georgia participates in the federal/state student incentive grant program. There is a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education serves as the State Board of Vocational Education. A special liaison committee composed of representatives from the state board and the regents works toward coordination of vocational/career programs and facilities throughout the state.

State-Level Organization of Private Colleges and Universities

The Association of Private Colleges and Universities in Georgia serves as a state organization for 25 private colleges and universities in the state. These institutions report HEGIS data to the Governor's Committee on Postsecondary Education.

Licensure/Approval Agencies

The State Department of Education serves as the licensing and approval agency for private degree-granting institutions and vocational-technical programs. Proprietary schools are licensed and approved by the standards section of the department.

PART II: DESCRIPTIVE STATISTICS

I. STATE POPULATION SIZE AND TRENDS 1979 (Census Data)

University System Degrees and Majors Authorized	Sept. 1981			University System of Georgia	Companion document for program inventory; listing of titles of actual degrees and majors

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Regents of the University of Hawaii, established in 1907, serves as the constitutional governing board for the University of Hawaii, a statewide multi-campus system of 6 community colleges, a complex land-grant university campus, a comprehensive undergraduate campus, and an upper division campus. The board has statutory authority in all areas of system policy, budgeting, programming, evaluating and governance.

Institutional Governing Boards

The University of Hawaii comprises all public higher education in Hawaii.

Master Planning

The individual campuses of the University of Hawaii are preparing long-range plans for academic and educational development. The State of Hawaii is currently developing a state plan which, if approved, will provide the basis for integrating the development plans into a single comprehensive master plan for public higher education.

1202 Commission

The members of the Board of Regents, supplemented by 4 other members, statutorily constitute the State Postsecondary Education (1202) Commission.

State Student Assistance and Loan Agencies

The Board of Regents of the University of Hawaii serves as the student assistance agency for institutions of public higher education. The state participates in the State Student Incentive Grant program which is administered by the 1202 Commission. The Guaranteed Student Loan Program is administered by United Student Aid Funds, Inc.

State Board of Vocational Education

The Board of Regents serves also as the State Board for Vocational Education with the basic responsibility for planning, coordinating and evaluating public vocational education programs at the secondary and postsecondary levels and for requesting and allocating federal funds within the state.

State-Level Organization of Private Colleges and Universities

The Hawaii Association of Independent Colleges and Universities is a state-level organization composed of the state's four private colleges.

Licensure/Approval Agencies

The State Department of Regulatory Agencies has chartering authority for private degree-granting institutions. Approval authority for proprietary vocational and technical schools lies with the State Department of Education.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The Vocational Education Coordinating Advisory Council coordinates vocational education programs and services at the secondary and postsecondary levels and the State Advisory Council on Vocational and Technical Education assists in planning vocational education programs at both levels.

IDAHO

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The State Board of Education/Board of Regents of the University of Idaho serves as a single constitutional board for all public education, including elementary, secondary and postsecondary levels. First established in 1890, the board became on July 1, 1974, 1 of 19 executive branch departments established through governmental reorganization. The board consists of 8 members, 7 appointed by the governor to five-year terms and the superintendent of public instruction, elected to a four-year term. All appointed members are representative of the general public. The board has the immediate governance of the State Department of Education, the 4 state senior institutions of higher education, the State School for the Deaf and the Blind, vocational education, the Eastern Idaho Vocational-Technical School, vocational rehabilitation and the office of the State Board of Education. It also has responsibility for the state library, the State Historical Society and the Idaho Pioneer Association; and general supervision of the public school system and the state's 2 junior colleges. The board has responsibility in all areas of planning and coordination for all senior, junior and vocational-technical public institutions, and conducts planning and coordination as a matter of policy for all private and proprietary institutions (as a 1202 commission). The board is responsible for budget review and recommendations for all agencies and institutions under its supervision, and has statutory responsibility for program approval of senior public institutions.

Idaho does not have a state office of secretary of education and the State Board of Education does not function as a cabinet department. Responsibilities of the board related to the affected institutions or agencies are carried out through its office headed by an executive director, appointed by and serving at the pleasure of the board, who reports directly to the board.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above. Junior colleges also are responsible to locally-elected boards of trustees.

Master Planning

Master planning is the responsibility of the State Board of Education in its capacity as the 1202 commission, assisted by a broad-based advisory council. Currently the commission is working on a long-range planning report focusing on areas of access, programs, facilities, finances, delivery systems and demographics.

1202 Commission

The State Board of Education has been designated by the governor as the 1202 commission.

State Student Assistance and Loan Agencies

The State Board of Education functions as the student assistance agency and Idaho participates in the federal state student incentive grant program. The governor has named a private agency to serve as the state guaranteed loan agency under the federal insured loan program.

State Board for Vocational Education

The State Board of Education is the State Board for Vocational Education.

State-Level Organization of Private Colleges and Universities

Idaho does not have a state-level organization for private colleges and universities.

Licensure/Approval Agencies

The State Department of Education under the Board of Education functions as the licensing and approval agency for vocational-technical and proprietary schools. No approval agency exists for private degree-granting institutions. In 1977, the Board of Education was given statutory authority for maintaining a register of courses and programs offered in Idaho by non-Idaho postsecondary institutions and for establishing operational standards for out-of-state institutions which desire to offer courses or programs in Idaho.

Statutory Advisory Committees and/or Task Forces

The Professional Standards Commission was established to adopt recognized professional codes and standards of ethics, conduct and professional practices that shall be applicable to public school teachers. The Advisory Council for Eastern Idaho Vocational-Technical School offers advice and counsel in the organization, establishment and conduct of the school.

Survey of State of Idaho Scholarship Recipients	Feb. 1980	Yes	State Board of Education	Office of the State Board of Education	Program evaluation; impact on recipients

PART IV: SPECIAL STUDIES AND REPORTS CURRENTLY UNDERWAY OR PLANNED

Special reports and studies expected to be completed, underway or planned from September 1980 to September 1981.

TITLE	EXPECTED COMPLETION DATE	IS THIS AVAILABLE FOR DISTRIBUTION?	REQUESTED BY WHOM	AGENCY COMPLETING THE REPORT	ISSUES AND AREAS CONCERNED IN REPORT
Fiscal Year 1980 Equity Analysis and Recommendations	March 1981	Yes	State Board of Education	Office of the State Board of Education, higher education institutions	Analysis of comparable program costs
Statistics on Postsecondary Education in Idaho	Jan. 1981	Yes (limited)	State Board of Education	Office of the State Board of Education	Appropriations, enrollments, degree programs, student costs, student financial assistance

ILLINOIS

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Higher Education functions as a statutory coordinating board for all postsecondary education within the state. The board was established in 1957 and its structure and responsibilities were amended in 1961, 1965, 1967, 1973 and 1978. The board consists of 16 members: 10 public members appointed by the governor with the consent of the senate, 5 members representing public institutions, governing and coordinating boards and a member representing students. All public members serve six-year terms of office. The board has statutory responsibility for planning and coordination of all public universities, community colleges and private institutions. In addition, the agency conducts planning and coordination as a matter of policy for public vocational/technical and proprietary institutions. The board has statutory responsibility for program approval, individual institutional budget review and consolidated budget recommendations for all public senior universities and community colleges. The board also has the statutory authority to approve new private higher education degree-granting institutions and their degree programs. Illinois does not have a secretary of education, and the coordinating agency does not serve as a cabinet department. The executive officer of the board is appointed by the board and serves at the pleasure of the board.

Institutional Governing Boards

The Illinois Community College Board serves as the coordinating board for 39 public community college districts in the state. The board operates within the planning and coordinating responsibilities of the Board of Higher Education. There are four governing boards for public senior institutions in the state: (1) the Board of Governors of State Colleges and Universities with statutory authority over five universities; (2) the Board of Regents of Regency Universities with statutory authority over three universities; (3) the Board of Trustees of Southern Illinois University with statutory responsibility for two public senior universities; and (4) the Board of Trustees of the University of Illinois with statutory responsibility for three campuses.

Master Planning

In November 1973 the Board of Higher Education began discussions concerning the need to revise the state master plan for postsecondary education. In 1974 the board approved a list of topics to be studied in the master plan revision process and a procedural plan was adopted. The current operational master plan was approved by the board in February 1976, and is the fourth revision of the statewide plan since 1964. This expanded efforts as a 1202 commission and instituted an on-going planning process focusing on selected topics.

A variety of subsequent studies resulting in revisions to master plan policies or specific efforts to implement those policies were reviewed in a July 1980 staff report to the board.

1202 Commission

The Board of Higher Education has been designated by the governor as the 1202 commission for the state. The board's membership was not augmented when it became a 1202 commission.

State Student Assistance and Loan Agencies

The Illinois State Scholarship Commission serves as the state student assistance agency and Illinois participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education functions as the State Board of Vocational Education. A joint board committee composed of members of the State Board of Education and the Board of Higher Education has been established as a means for the two boards to consider matters of common concern.

State-Level Organization of Private Colleges and Universities

The Federation of Independent Illinois Colleges and Universities serves as the state-level organization for 52 private institutions.

Licensure/Approval Agencies

The State Board of Education and the Department of Registration and Education serve as the approval and licensing agencies for those postsecondary institutions and proprietary schools not covered by the Board of Higher Education.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The Joint Education Committee is a statutorily created body composed of 3 members from the Board of Higher Education and 3 from the State Board of Education to improve communication and articulation between the education segments in the state, and to address matters of common concern to both boards.

Statutory Advisory Committees and/or Task Forces

The Community Service and Continuing Education Council is mandated by federal law to advise the Board of Higher Education about the allocation of federal funds within the state. Although there are no statutory advisory committees, the board on its own initiative has established a number of advisory committees to the board in the areas of faculty, students, citizens, nonpublic education, proprietary schools and a commission of scholars to advise on the quality of proposed doctoral programs.

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Commission for Higher Education, established in 1971, functions as the statutory coordinating agency for all postsecondary education in the state. The commission has 12 members, representing the general public and appointed by the governor for terms of four years. The commission is charged by statute with four responsibilities: (1) long-range planning for postsecondary education in Indiana, (2) approval of new program requests, (3) review existing programs and (4) review of budget requests and the recommendation to the executive and legislative branches of state government. Indiana does not have an office of secretary of education and the coordinating agency is not a cabinet department. The executive officer of the commission is appointed by the commission and serves at its pleasure.

Institutional Governing Boards

Indiana has 6 public institutional governing boards: (1) Ball State University Board of Trustees with authority over 1 public senior college; (2) Indiana State University Board of Trustees, the board for 2 campuses; (3) Indiana Vocational-Technical College Board of Trustees, with authority over 13 vocational institutions in the state; (4) the Board of Trustees of Indiana University for 8 campuses; (5) the Board of Trustees of Purdue University for 4 campuses; and (6) the Trustees of Vincennes University, responsible for a single public junior college.

Master Planning

The master plan published by the Indiana Commission for Higher Education in June 1973 contained 59 policy and procedural recommendations.

1202 Commission

The Commission for Higher Education has been designated by the governor as the 1202 commission and its membership was not augmented.

State Student Assistance and Loan Agencies

The State Student Assistance Commission of Indiana serves as the state student assistance agency and the state participates in the federal state student incentive grant program. Legislation enacted in 1977 reorganized the state agency and authorized it to operate as a loan guarantee agency under the federal Guaranteed Student Loan Program.

State Board of Vocational Education

The State Board of Vocational and Technical Education is the State Board for Vocational Education. Members are appointed as follows: (1) the state superintendent of public instruction (ex officio), (2) the executive officer of the Commission for Higher Education (ex officio), (3) a member of the State Board of Education, (4) a Commission for Higher Education member, (5) a member of a governing board of a secondary vocational institution, (6) a member of a governing board of a postsecondary vocational institution, and (7) one member each representing secondary vocational administration, postsecondary vocational administration, labor, business and agriculture.

State-Level Organization of Private Colleges and Universities

The Independent Colleges and Universities of Indiana, Inc., serves as the organization for 33 private colleges and universities within the state. The Association of Private Schools is a similar type of organization representing the private trade, business and technical schools in Indiana.

Licensure/Approval Agencies

The Indiana Commission on Postsecondary Proprietary Education functions as the statutory licensing and approval authority for proprietary institutions. Legislative action in 1977 clarified the role and responsibilities of this agency.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

The Indiana Conference of Higher Education represents both the public and private colleges and universities and is a voluntary organization dedicated to the betterment of overall postsecondary education.

Statutory Advisory Committees and/or Task Forces

A Higher Education Council was established by the legislature in 1975, made up of 4 legislators from each house to serve as the liaison between the legislature, the Commission for Higher Education and the state higher education institutions. The council is to establish legislature priorities in higher education, analyze budget information, and review state, federal, and private revenues for the commission's activities. An Ad Hoc Committee assists the commission, in an advisory capacity, on the various federal grant programs administered by the commission. The Research Advisory Council serves in an advisory capacity to the State Board of Vocational Technical Education.

*Indiana Commission for Higher Education

IOWA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

Iowa has no statutory state-level coordinating and/or governing agency. The Iowa Coordinating Council on Post-High School Education, with a volunteer staff, serves as a voluntary statewide organization for all postsecondary education, including all merged area schools, private colleges and universities, public universities and private specialized and proprietary institutions, the state student aid agency and public television.

Institutional Governing Boards

The State Board of Regents, established in 1909, serves as the statutory governing body for all public senior higher education in the state. The board is composed of 9 members appointed by the governor with the consent of the senate, all representing the general public and serving six-year terms. The board has statutory governing authority for 3 public senior colleges, including program approval, planning and coordination and review of institutional budgets, including recommendations for a consolidated budget. Merged area schools (13 public community colleges and 2 vocational-technical schools) are under the jurisdiction of the State Board of Public Instruction, and are governed by locally elected boards of directors. The State Board of Public Instruction, which has statutory coordinating authority, has a composition and appointment process similar to the State Board of Regents, as well as similar areas of jurisdiction. However, the regents have statutory responsibility to approve, jointly with the State Board of Public Instruction, the approval standards for merged area schools and community colleges and participates jointly in annual visitations.

Iowa does not have an office of secretary of education and the agency is not a cabinet department within the state. The executive officer of the Board of Regents is appointed by the board and serves at the pleasure of the board. The state superintendent of public instruction serves at the pleasure of the State Board of Public Instruction.

Master Planning

Information concerning the scope of master planning for all postsecondary education within the state is not available.

1202 Commission

The Iowa Coordinating Council on Post-High School Education has been designated by the governor as the "planning and policy formulation process" for purposes of the Higher Education Act of 1965 as amended in 1980. The Iowa College Aid Commission has been designated by the Coordinating Council to administer the state student incentive grant program and the Undergraduate Academic Facilities Grant Program. Responsibility for the continuing education outreach program are divided between the Iowa Coordinating Council for Post-High School Education, the State Board of Regents and the College Aid Commission with the Coordinating Council responsible for overall coordination.

State Student Assistance and Loan Agencies

The Iowa College Aid Commission serves as the state student assistance agency, the federal state student incentive grant program and the state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Public Instruction functions as the State Board of Vocational Education and exercises statutory authority over the 15 merged area schools.

State-Level Organization of Private Colleges and Universities

The Iowa Association of Private Colleges and Universities serves as the state-level organization for 29 private colleges and universities.

Licensure/Approval Agencies

No approval and licensing agency exists for private degree-granting institutions and vocational-technical institutions. The State Board of Public Instruction has been designated as the official approval agency for two-year public postsecondary vocational-technical programs by the Office of Education.

Related Nongovernmental Organization With Staffs and Programs -- Representing Both Public and Private Institutions

The Iowa Coordinating Council for Postsecondary High School Education, with a part-time staff, serves as a voluntary statewide organization for all postsecondary education, including all accredited public area schools and community colleges, the private colleges and universities, the public universities and the private specialized and proprietary institutions.

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The State Board of Regents, established in 1925, functions as the constitutional governing agency for 6 public universities in the state, and the state-supported two-year technical institute in Kansas. The structure and responsibilities of the agency were amended in 1966, 1970 and 1975. The 9 members of the board are appointed by the governor with the consent of the senate, represent the general public and serve four-year terms of office. Community colleges are under individual governing boards that are supervised by the State Board of Education. Designated postsecondary area vocational schools which are not community colleges relate to the State Board of Education. There is one municipal university with its own governing board.

The Board of Regents has statutory responsibility for planning and coordination, institutional budget review including consolidated budget recommendations and program approval for all state senior institutions. The agency does not serve as a cabinet department and the office of secretary of education does not exist at the state level. The executive officer of the Board of Regents is appointed by the board and serves at the board's pleasure.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

Master planning for the universities governed by the regents is accomplished through a small professional staff in the Board of Regents office working with committees of representatives from each of the 7 institutions. This approach to systemwide planning was formalized in 1969 when, with the approval of the regents, the presidents of the 6 universities established the Council of Chief Academic Officers and charged this group with the review of programs at the institutions and the development of a more efficient and effective regents' system in Kansas.

1202 Commission

The 1202 Commission has the responsibility for the statewide postsecondary planning. The Legislative Educational Planning Committee, a committee of the state legislature, has been designated by the governor as the 1202 commission. The committee consists of 11 members: 5 members from the senate and 6 from the house.

State Student Assistance and Loan Agencies

The Board of Regents serves as the state student assistance agency and the state participates in the federal state student incentive grant program. The Kansas tuition grant program provides grants to approximately one-third of all private college students in the state. Since the fall of 1977 Kansas has had a private foundation, The Higher Education Loan Program of Kansas, Inc., serving as a loan guarantee agency and as a direct lender.

State Board of Vocational Education

The State Board of Education serves as the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Associated Independent Colleges of Kansas serves as the statewide organization representing 20 private colleges and universities.

Licensure/Approval Agencies

The State Department of Education has approval authority over all vocational-technical and proprietary institutions in the state. The Board of Regents has licensure authority over new in-state degree-granting institutions and registers out-of-state institutions offering night courses in Kansas.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The Academic Committee of the Board of Regents meets quarterly with the State Board of Education and, although the group generally discusses postsecondary education issues, channels are available for discussion of elementary-secondary and postsecondary concerns.

Statutory Advisory Committees and/or Task Forces

A statutory student advisory committee to the regents was established in 1975. The committee consists of the student body president for each institution and serves in a policy advisory capacity to the Board of Regents.

KANSAS

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Council on Higher Education, established in 1934 and amended in structure and function in 1966, 1972, 1978 and 1980, serves as a statutory coordinating agency for Kentucky. The council consists of 17 members, including 15 voting members, representative of the general public, who are appointed by the governor and who serve six-year terms of office. Two nonvoting members serve in an ex officio capacity: the state superintendent of public instruction and a representative of the State Board of Education. The presidents of Kentucky's eight public universities, who were formerly ex officio, nonvoting members, were removed from the council by gubernatorial executive order in July, 1980. The council has statutory authority for comprehensive planning, institutional budget review, consolidated recommendations for state funding of higher education, approval of all degree programs, review and approval of all capital construction and renovation projects exceeding $100,000 in cost, and determination of tuition/fee levels and entrance requirements at the public institutions. The state has a secretary for education and arts; however, the council is an independent board reporting to the governor, although it is responsive to the legislature. The executive officer of the agency is appointed by the council and serves at its pleasure.

Institutional Governing Boards

There are 8 institutional governing boards for the public institutions in Kentucky. The Board of Trustees of the University of Kentucky govern 13 public community colleges and the senior institution. Each of the other 7 boards governs a single institution: the Board of Trustees of the University of Louisville; the Board of Regents of Eastern Kentucky University; the Board of Regents of Kentucky State University; the Board of Regents of Morehead State University; the Board of Regents of Murray State University; the Board of Regents of Northern Kentucky University; and the Board of Regents of Western Kentucky University.

Master Planning

A primary mandate of the Council on Higher Education is comprehensive planning. Rather than working toward the development of a single comprehensive planning document to answer all questions and solve all problems for a length of time, the council makes its comprehensive planning effort a continuing process. A major project was begun in early 1980 to determine the condition of the state and how it relates to higher education and, as a result of that determination, to develop recommendations or proposals affecting higher education in the future. A committee of prominent Kentuckians is using its analysis of Kentucky's future as a basis for developing broad-based proposals for the direction of Kentucky higher education in the 1980's and 1990's. The proposals are to be used by the council and the institutions as framework for future comprehensive planning and action. The committee is scheduled to complete its work in October 1981.

1202 Commission

The State Advisory Council on Vocational Education, a 21-member board appointed by the governor, was designated as the 1202 commission by executive order in 1978.

State Student Assistance and Loan Agencies

The Higher Education Assistance Authority (KHEAA), with 9 members, functions as the state student assistance agency. Kentucky participates in the federal state student incentive grant program. KHEAA administers a guaranteed student loan program for students attending eligible postsecondary educational institutions in Kentucky and for residents attending schools out of state. In addition, the Kentucky Higher Education Student Loan Corporation operates a direct loan program for students who cannot obtain a guaranteed student loan from a private lender. The corporation also functions as a secondary market for the purchase of loans made by Kentucky lenders.

State Board of Vocational Education

The State Board of Education is the state board of vocational education. Operational responsibility for public postsecondary programs outside colleges and universities lies with the Bureau of Vocational Education, which is within the State Department of Education.

State-Level Organization of Private Colleges and Universities

The Council of Independent Kentucky Colleges and Universities serves as the state-level organization of 20 of the 21 accredited private colleges and universities.

Licensure/Approval Agencies

The Council on Higher Education has the authority for licensing and approval of private degree-granting institutions. The State Department of Education has licensing and approval authority for vocational-technical schools. Proprietary institutions are licensed by the State Board for Proprietary Education.

Tuition Policy Study	Fall 1981	Yes	Internal	Council on Higher Education	Rationale for determining appropriate tuition levels for students in Kentucky's state-supported colleges and universities

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Regents, created in 1974 as the successor to the Louisiana Coordinating Council, serves as the constitutional statewide coordinating agency for postsecondary education. The board consists of 15 members appointed by the governor with the consent of the senate. All 15 members represent the general public and serve six-year terms of office. The board has constitutional authority for planning and coordination for all public senior and junior institutions of higher education and constitutional responsibility for institutional budget review, recommending a consolidated budget and program approval for public senior and junior institutions. Proposed and existing degree programs are subject to board approval. The state does not have an office of secretary of education and the agency does not serve as a cabinet department. The executive officer of the board is appointed by the board and serves at the board's pleasure.

Institutional Governing Boards

Three institutional governing boards exist in the state which were created by the 1974 constitution. Each board has 18 members appointed by the governor with the consent of the senate (17 representatives from the general public and 1 student member). The three governing boards are: (1) the Board of Supervisors of Louisiana State University and Agricultural and Mechanical College, governing 2 public junior colleges, 3 public senior colleges, a law center and a medical center; (2) the Board of Supervisors of Southern University and Agricultural and Mechanical College, responsible for 1 public junior college and 2 public senior institutions; and (3) the Board of Trustees for State Colleges and Universities governing 8 public senior institutions and 1 public junior college.

Master Planning

In December 1977, the Board of Regents adopted a comprehensive state plan for higher education for the remainder of the 1970s. The master plan was published April 1978. A progress report was published February 1980.

1202 Commission

The Board of Regents has been designated by the governor as the 1202 commission.

State Student Assistance and Loan Agencies

The Governor's Special Commission on Education Services serves as the state student assistance agency and Louisiana participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Elementary and Secondary Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Louisiana Association of Independent Colleges and Universities serves as the state-level organization for 8 private colleges and universities.

Licensure/Approval Agencies

The State Board of Elementary and Secondary Education functions as the approval agency for vocational-technical and proprietary schools. No agency serves as the approval and licensing authority for private degree-granting institutions.

Voluntary or Statutory Committee for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The state constitution requires that the Board of Regents and the Board of Elementary and Secondary Education meet jointly at least twice a year for the purpose of coordinating elementary-secondary and postsecondary education.

Educational Information Center

The Board of Regents has been designated by the governor as the Educational Information Center.

LOUISIANA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Trustees of the University of Maine, established in 1968, is the principal statutory governing agency for public postsecondary education in the state. The board consists of 15 members -- 14 appointed by the governor for seven-year terms and the commissioner of educational and cultural services who serves in an ex officio capacity. The Board of Trustees has statutory responsibility for planning and coordination, institutional budget review and consolidated budget recommendations and program approval for all campuses of the university. Maine does not have an office of secretary of education and the board does not serve as a cabinet department. The executive officer of the board is appointed by the board and serves at the pleasure of the board. Two other institutional governing agencies exist within the state; the Board of Trustees of Maine Maritime Academy responsible for 1 public senior institution and the State Board of Education responsible for 7 vocational-technical institutes.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

Information is not available concerning the scope of master planning within the state.

1202 Commission

The Postsecondary Education Commission, the 1202 Commission, is a statutory agency established in 1975 and is responsible for statewide planning for postsecondary education. The commission consists of 16 members appointed by the governor with 4 representing the general public, 6 representing public boards and advisory councils, 3 representing private institutions and a single member representing proprietary education. The chancellor of the university and the commissioner of educational and cultural services serve as ex officio members.

State Student Assistance and Loan Agencies

The State Department of Educational and Cultural Services serves as the state agency for student assistance and Maine participates in the federal state student incentive grant program for private and public institutions. Maine has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

Maine does not have a state-level organization for private colleges and universities, although all public, private and proprietary institutions are members of the Higher Education Council.

Licensure/Approval Agencies

The State Department of Educational and Cultural Services is responsible for recommending to the legislature approval of degree-granting authority for postsecondary education institutions.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

The Maine Higher Education Council is a voluntary organization dedicated to improving higher education in the state. Its membership is composed of the presidents or institutional heads of all postsecondary institutions, public, private and proprietary. It is staffed by a part-time executive director.

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

Legislation was passed in 1976 and signed into law that replaced the Council for Higher Education with the State Board for Higher Education. The board consists of 11 lay members, all appointed by the governor with the advice and consent of the senate for five-year terms. Board members are eligible for reappointment, but no member may serve more than two full five-year terms. The State Board for Higher Education has the following major statutory responsibilities: (1) prepare and annually review a statewide plan for postsecondary education; (2) review operating and capital budgets and capital projects of public institutions and to make recommendations consistent with the statewide plan; (3) prescribe minimum degree requirements for public and private institutions; (4) review and approve new academic programs; (5) administer state funds received by private institutions according to the aid to nonpublic institutions of higher education law; and (6) coordinate educational policies with the State Board of Education, the State Public School Agency, through the Educational Coordinating Committee. The Commissioner of Higher Education is the board's chief executive officer and a member of the governor's cabinet. The commissioner is appointed by the board for a four-year term and is eligible for unlimited reappointment.

Institutional Governing Boards

The state system of public higher education consists of 3 major segments. The Board of Regents of the University of Maryland governs the university's campuses. The Board of Trustees of the State Universities and Colleges governs 2 universities and 4 public senior colleges. The State Board for Community Colleges serves as a statutory coordinating agency for 17 community colleges which are governed by local boards. Additionally, St. Mary's College and Morgan State University, both senior public institutions, are governed by their own boards of trustees.

Master Planning

The State Board for Higher Education has been designated by statute as the state's 1202 commission.

1202 Commission

The State Board for Higher Education has been designated by statute as the state's 1202 commission.

State Student Assistance and Loan Agencies

The State Scholarship Board and the Higher Education Loan Corporation are the state agencies administering student assistance programs. Maryland participates in the federal state student incentive grant program and the state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Maryland Independent College and University Association represents 17 private colleges and universities in the state.

Licensure/Approval Agencies

The State Board for Higher Education has licensing and approval authority for all private and proprietary institutions of postsecondary education. In addition, this agency has the responsibility as the state approving agency for the Veteran's Administration.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The State Board for Higher Education is charged by statute to coordinate educational policies with the State Board of Education through an Educational Coordinating Committee consisting of three members of the Board of Education, three members of the State Board for Higher Education, the Superintendent of Schools and the Commissioner of Higher Education.

Statutory Advisory Committees and/or Task Forces

A 9-member segmental advisory committee to the State Board for Higher Education is appointed by the governor from nominations submitted by the governing boards of public and private higher education institutions and segments and postsecondary vocational-technical institutions. Committee members serve for a term of two years and are eligible for reappointment, but no member may serve for more than two full two-year terms. There is also a student advisory committee, consisting of the presidents of each of the campuses student governing associations, and a faculty advisory committee, with 11 members, to the board. In addition, the Maryland Fire-Rescue Education and Training Commission consists of 11 members appointed by the governor with the advice and consent of the senate for four-year terms. The commission meets every two months and develops minimum uniform standards for the education and training of emergency services instructors, users and schools. The commission is required to prepare an annual report on its activities and its powers and responsibilities are subject to the authority of the Commissioner of Higher Education.

*State Board for Higher Education

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Regents of Higher Education is the statutory governing body for all public higher education in Massachusetts. Established in 1980 as the result of a comprehensive, legislative reorganization of higher education governance, the Board of Regents succeeds the Executive Office of Educational Affairs, the Massachusetts Board of Higher Education, the Massachusetts State College Board of Trustees, and the Massachusetts Board of Regional Community Colleges; all of which were eliminated as of March 1, 1981. There are 15 board members appointed by the governor to five-year terms of office (initial appointments have staggered terms to ensure a three-member rollover each year). The executive officer of the Board of Regents is appointed by and serves at the pleasure of the board. The chancellor is the senior executive officer and is responsible for the administration of Board of Regents policy and the overall operation of the 28-institution system.

The board has statutory and contractual authority for the governance of the system, including academic affairs, student services, fiscal control, labor relations, and planning and research. In addition to its responsibilities in the public sector, the Board of Regents is charged with coordination of public and independent higher education endeavors, as well as approval and review of new and expanded degree offerings for 115 public and independent postsecondary institutions throughout the state.

Institutional Governing Boards

Each of the 28 public institutions of higher education has its own board of trustees. Each board of trustees has eight members, including one alumnus of the institution, appointed for five-year terms in a manner similar to the Board of Regents. The boards of trustees are charged with administrative management of the institutions under their control and may exercise any authority delegated them by the Board of Regents.

Master Planning

The Board of Regents is statutorily charged with developing a Five-Year Master Plan, updated annually, for public higher education. Additionally, the board has responsibility for overall planning and coordination of public and independent postsecondary education.

1202 Commission

The Board of Regents of Higher Education has been designated by the governor to administer federal programs under Title I of the Higher Education Act. The Board of Regents thus displaces the 1202 Commission which had been established in 1974 for this purpose.

State Student Assistance and Loan Agencies

The Board of Regents of Higher Education administers the state sponsored scholarship program, the police incentive pay program and serves as the state veterans approving agency under contract with the Veteran's Administration. The state participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program administered by the Massachusetts Higher Education Assistance Corporation.

State Board of Vocational Education

The Massachusetts Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Association of Independent Colleges and Universities in Massachusetts serves as the state-level organization for 57 private colleges and universities.

Licensure/Approval Agencies

The Board of Regents of Higher Education has authority over awarding of degrees and approval of charter amendments for all private institutions in the state -- proprietary and nonprofit.

Statutory Advisory Committees and/or Task Forces

No advisory committees or task forces are currently mandated by statute.

PART II: DESCRIPTIVE STATISTICS

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

Under the 1963 state constitution, the State Board of Education has responsibility for elementary-secondary education and also serves as the state coordinating agency in postsecondary education. The board's responsibilities include: the coordination of services for public two- and four-year colleges and universities through policy recommendations to the legislature with regard to budgetary and programmatic matters; licensing authority for vocational and proprietary institutions; and charter approval and degree reimbursement payment authorization for private degree-granting colleges. The State Board of Education is composed of eight elected members who serve eight-year terms. It also includes the governor and superintendent of public instruction as ex officio members.

The state does not have an office of secretary of education and the board does not serve as a cabinet department. The executive officer of the board is appointed by the board and serves at the pleasure of the board. The Community College Board is a constitutional advisory body to the State Board of Education. The Higher Education Facilities Commission and Authority serves as the statutory authority to provide for tax-exempt loans to independent nonprofit colleges for facilities acquisition, construction or remodeling.

Institutional Governing Boards

Institutional governing boards within the state include: (1) 10 boards of control or trustees appointed by the governor for four-year public colleges and universities, each responsible for a single institution; (2) the elected Board of Regents of the University of Michigan, a constitutional board governing the 3 branches of the university; and (3) the elected Board of Governors of Wayne State University and the Board of Trustees of Michigan State University, both constitutional boards each responsible for a single public senior institution. The 29 public two-year community colleges each have regionally elected governing boards.

Master Planning

A state plan for higher education was approved in 1969. This document was augmented in the 1970s by State Board of Education topical postsecondary policy position papers on six issues. In addition, a complete inventory of all academic programs available at Michigan public and nonpublic colleges, as well as vocational and proprietary schools is compiled on an annual basis. Periodic topical planning papers are also developed as the need arises.

1202 Commission

The governor has designated the State Board of Education as the 1202 commission for the state.

State Student Assistance and Loan Agencies

The Michigan Higher Education Assistance Authority, administratively attached to the State Board of Education, serves as the state student assistance agency and administers a variety of state-funded student assistance options. Michigan participates in the federal state student incentive grant program and the federal insured loan program. A companion agency, the Michigan Higher Education Student Loan Authority, provides direct student loans to students.

State Board of Vocational Education

The State Board of Education serves as the State Board of Vocational Education. With recommendations from the Community College Board, the board approves occupational programs for the 29 public community and junior colleges.

State-Level Organization of Private Colleges and Universities

The Association of Independent Colleges and Universities functions as the state-level organization for most of the independent degree-granting colleges and universities in the state.

Licensure/Approval Agencies

The State Board of Education has licensing authority for nondegree vocational-technical and proprietary institutions within the state. Such institutions outside of Michigan that wish to recruit Michigan students must have their recruiters licensed in a similar manner. The board also approves the charters for private degree-granting institutions.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The State Board of Education recently made a policy decision that its Bureau of Postsecondary Education will regularly seek input from a volunteer broadly representative advisory council, including representatives from the public schools. The structure of the council has not as yet been determined.

Statutory Advisory Committees and/or Task Forces

The only statutory advisory committee not noted in the sections above is the State Board for Libraries that serves in an advisory and coordination capacity for all libraries in the state.

MICHIGAN

*Department of Education

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Higher Education Coordinating Board serves as the statutory coordinating agency for postsecondary education in Minnesota. The agency was established in 1965 and has been amended eight times since its inception, most recently in 1977. The board consists of 11 members appointed by the governor with the consent of the senate, all representing the general public and serving four-year terms of office. Eight represent congressional districts and 3 serve at large. The board has statutory authority for planning and coordination for all postsecondary education in the state (public junior, senior, vocational-technical, private and proprietary). In addition, the board has statutory responsibility for budget and program review and monitoring credit transferability. The state does not have an office of secretary of education and the board does not serve as a cabinet department. The executive officer of the agency is elected by the board and serves at the pleasure of the board.

Institutional Governing Boards

There are 4 institutional governing boards in Minnesota: (1) the Board of Regents of the University of Minnesota with constitutional authority for 3 public senior universities and 2 public junior institutions (technical colleges for agricultural-related activities), (2) the State Board for Community Colleges with statutory authority for 18 public community colleges, (3) the State Board of Education with statutory authority for 33 vocational institutions and (4) the State University Board with statutory authority for 7 public senior universities.

Master Planning

A comprehensive continuing planning effort is used. Recommendations for state policy are made to the governor and legislature every two years by the coordinating board.

1202 Commission

The Higher Education Coordinating Board has been designated by the governor as the 1202 agency for Minnesota.

State Student Assistance and Loan Agencies

The Higher Education Coordinating Board serves as the State Student Assistance Agency. In this capacity it administers 12 programs of financial assistance. The principal programs are the State Scholarship and Grant Program, the State Guaranteed Student Loan Program and Tuition Reciprocity Agreements with Wisconsin, North Dakota and South Dakota.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

There are three organizations representing the private postsecondary education institutions in Minnesota: (1) the Minnesota Private College Council serves as the organization for 17 private colleges and universities in the state; (2) the Consortium of Minnesota Seminary Faculties serves six seminaries in the state; and (3) the Minnesota Association of Private Vocational Schools represents 35 private postsecondary vocational institutions in Minnesota. In addition, there are over a dozen other private degree-granting institutions in the state which are not affiliated with these organizations.

Licensure/Approval Agencies

The Higher Education Coordinating Board functions as the approval and registration agency for private degree-granting institutions. The State Department of Education functions as the approval and licensing agency for vocational-technical and proprietary schools.

MINNESOTA

*Higher Education Coordinating Board.

MISSISSIPPI

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Trustees of State Institutions of Higher Learning, established in 1910 and reorganized in 1944, exercises constitutional governing authority over eight public institutions in the state. The board consists of 13 members who are appointed by the governor with the consent of the senate and who represent the general public. Twelve of the members serve twelve-year terms, and one member serves a four-year term. The board has statutory authority for planning and coordination, institutional budget review and consolidated budget recommendations and program approval for the eight senior institutions that it governs. The state does not have an office of Secretary of Education and the board does not serve as a cabinet department. The executive officer of the board does not serve as a cabinet department. The executive officer of the board is appointed by the board and serves under a four-year contract. The Division of Junior Colleges of the State Department of Education functions as a statutory regulatory and coordinating agency for the state's 16 public junior colleges.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

Information concerning the scope of master planning for all postsecondary education within the state is unavailable. A special committee of the Board of Trustees has been designated to study mission statements for each of the public universities.

1202 Commission

The Postsecondary Education Planning Board has been designated by the governor as the state's 1202 commission. The Planning Board consists of 27 members appointed by the governor, with seven representing the general public, 11 public institutions, two each representing private institutions, proprietary institutions and faculty, and one each representing vocational-technical institutions, the student body and other.

State Student Assistance and Loan Agencies

The 1975 Mississippi Legislature created the Mississippi Postsecondary Education Financial Assistance Board to handle the federally insured student loan program. In December 1979, the state student incentive grant program was also placed under the direction of this board. The Board of Trustees is the administrative and fiscal agency for the Mississippi Postsecondary Education Financial Assistance Board. In addition, the Board of Trustees administers the Out-of-State Scholarship Program, the Medical Education Loan Program, the Nursing Education Aid Program, the Academic Common Market of the Southern Regional Education Board (SREB), and the SREB Program. Scholarships are also provided through the Board of Trustees' office for the children of POWs/MIAs and for children of firemen and policemen killed or permanently disabled in the line of duty.

State Board of Vocational Education

The State Board of Education functions as the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Mississippi Association of Private Colleges functions as the state-level organization for 13 private colleges and universities.

Licensure/Approval Agencies

The Board of Trustees of State Institutions of Higher Learning functions as the approval and licensing agency for private degree-granting institutions in the state. The State Department of Education serves as the approval and licensing authority for proprietary schools. The Board of Trustees is the accrediting agency for all nursing education programs.

MISSOURI

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Coordinating Board for Higher Education, staffed by the Department of Higher Education, was established in 1974 and functions as the constitutional coordinating agency for postsecondary education in the state. The board has 9 members appointed by the governor with the consent of the senate. All 9 members represent the general public and serve six-year terms of office. The board has statutory responsibility for planning and coordination for public senior, junior, vocational-technical and private institutions; institutional budget review and making budget recommendations; and program approval for public senior and junior institutions. The coordinating board is a cabinet-level agency. The executive officer of the board is appointed by the board and serves at its pleasure.

Institutional Governing Boards

Institutional governing boards in the state include: (1) the Board of Curators of the University of Missouri with constitutional authority for 4 campuses; (2) the statutory Board of Curators of Lincoln University; (3) 10 boards of trustees over 10 junior college districts, including 8 single campus districts, on 3-campus district and 14-campus district; (4) the boards of regents of state colleges and universities [7 boards] exercising authority over the 7 public senior colleges; and (5) the Board of Regents of Harris-Stowe State College.

Master Planning

One of the established priorities for the Department of Higher Education is the development of procedures and strategies for comprehensive master planning for all postsecondary institutions in Missouri. A comprehensive plan has been developed and planning is a continuous process.

1202 Commission

The governor has designated the Coordinating Board for Higher Education as the 1202 commission.

State Student Assistance and Loan Agencies

The Department of Higher Education functions as the state's student assistance agency and Missouri participates in the federal state student incentive grant program. The department continues to service loans made from 1968-1971, and a state guaranteed student loan program was implemented in 1979-1980. In the first two years of operation the loan level is approaching $100 million.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education in Missouri.

State-Level Organization of Private Colleges and Universities

The Independent Colleges and Universities of Missouri serves as a state-level organization for 30 private colleges and universities.

Licensure/Approval Agencies

While private degree-granting and proprietary institutions may voluntarily incorporate with the office of Secretary of State, there is no approval authority in Missouri. Legislation has been introduced on several occasions to authorize regulation and licensure of proprietary and degree-granting institutions in Missouri.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The Missouri School College Relations Commission is a voluntary organization to develop articulation between the segments.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

The Missouri Association of Community/Junior Colleges represents all two-year public and private colleges.

Statutory Advisory Committees and/or Task Forces

The Advisory Committee, made up of 18 public and private institutional presidents, meets at least four times a year with the Coordinating Board for Higher Education. The board seeks its advice on any matter and requests studies and reports. The committee makes recommendations on its own initiative as well.

MISSOURI

*Coordinating Board for Higher Education
**Missouri Department of Higher Education

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Regents of Higher Education, established and amended with regard to structure and function in 1973, functions as a constitutional governing agency for the Montana University System and has supervisory and coordinating authority over the state's community colleges. The Board of Regents and the Board of Public Education together compose the State Board of Education, a single board for all public education in the state. The Board of Regents consists of 10 members, 7 appointed by the governor with the consent of the senate and 3 members who serve in an ex officio capacity. Of those appointed, there are 6 representing the general public and 1 student. The ex officio members include the commissioner of higher education, the state superintendent of public instruction and the governor. With the exception of the student, all appointed members serve seven-year terms of office. The Board of Regents has constitutional authority for planning and coordination, institutional budget review and making consolidated budget recommendations and program review and approval for public senior institutions, and statutory authority for the same functions with respect to community colleges. The state does not have an office of secretary of education and the agency does not function as a cabinet department. The executive officer of the Board of Regents and the University System, the commissioner of higher education, is appointed by the board and serves at its pleasure.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

The commissioner of Higher Education conducts master planning for the public sector.

1202 Commission

The Commission on Federal Higher Education Programs, which includes the Board of Regents of Higher Education, has been designated by the governor as the 1202 commission. The 7 appointed members from the regents represent the general public and 3 members represent private and proprietary institutions. The commissioner of higher education or his designee is the executive officer.

State Student Assistance and Loan Agencies

The office of the commissioner of higher education functions as the state student assistance agency and the state participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The Board of Public Education functions as the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

There is no formal state-level organization for private colleges and universities in the state.

Licensure-Approval Agencies

The Board of Regents of Higher Education functions as the approval and licensing authority for private degree-granting institutions. Proprietary schools are approved by the State Department of Business Regulation with counsel from an advisory board which includes the superintendent of public instruction and the commissioner of higher education as ex officio members. The commissioner's approval is required before such institutions may use the designation "college" or "university."

Voluntary or Statutory Committees for Articulation, Communication etc., Between Elementary-Secondary and Postsecondary Education

In addition to the Board of Regents and Board of Public Education sitting together as the State Board of Education, there is a joint curriculum committee for teacher preparation and certification, a joint committee for vocational education policies and a joint long-range planning committee.

Statutory Advisory Committees and/or Task Forces

In Montana there are no longer advisory committees created by statute generally and each department head is authorized by law to create advisory councils. For example, such councils have been established by the regents for presidents, academic vice presidents, faculty and students, affirmative action, budgets, management information systems, computer coordination and others.

MONTANA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Coordinating Commission for Postsecondary Education was established in March 1976 by the legislature with 12 members, including 6 appointed from the general public. The 6 other members include 1 representative each appointed by and from the university and college governing boards, a representative of the community colleges appointed by the governor, 1 representative each from the independent and proprietary sector appointed by the governor and the state commissioner of education or a representative from the State Board of Education. The coordinating commission is to facilitate communication and coordination among the institutions; to advice, consult and cooperate with other state agencies, the federal government, other states and the institutions; to administer federal and state funds; to conduct studies and research including enrollment projections; and to recommend short-range goals and plans to the postsecondary institutions including private and proprietary. Nebraska does not have a secretary of education and the commission does not serve as a cabinet department. The executive officer is appointed by and serves at the pleasure of the commission.

Institutional Governing Boards

Two constitutional governing boards for public institutions exist in the state: the Board of Regents of the University of Nebraska responsible for 3 public senior colleges including a medical center and the Board of Trustees of Nebraska State Colleges responsible for 4 public senior institutions. There are 6 technical/community college areas, each governed by a locally elected board of 11 members.

Master Planning

The Coordinating Commission for Postsecondary Education is responsible for providing for a statewide perspective and emphasis in decision making and planning for postsecondary education.

1202 Commission

The Coordinating Commission for Postsecondary Education replaced the former 1202 commission and has assumed the duties of the 1202 commission.

State Student Assistance and Loan Agencies

The Coordinating Commission for Postsecondary Education has the responsibility of administering the federal state student incentive grant program.

State Board of Vocational Education

The State Board of Education functions as the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Nebraska Association of Independent Colleges and Universities functions as the state-level organization for 11 private colleges and universities.

Licensure/Approval Agencies

The State Board of Education has licensing and approval authority for proprietary institutions. The Nebraska Coordinating Commission for Postsecondary Education has responsibility for new two- and four-year colleges and universities plus authority to approve out-of-state institutions operating within the State of Nebraska.

Voluntary or Statutory Committees for Articulation, Communication etc., Between Elementary-Secondary and Postsecondary Education

The State Accreditation Committee serves as an advisory committee to the State Board of Education for decisions on rules and regulations and articulation between elementary-secondary education and postsecondary education.

NEVADA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Regents of the University of Nevada System, established in 1864, functions as the constitutional governing agency for postsecondary education in the state. The board consists of 9 members elected by the public for six-year terms of office. The board has statutory authority for planning and coordination for public senior, junior and vocational-technical institutions. In addition, the board has statutory responsibility for budget review and consolidated budget recommendations and program approval for senior and junior public institutions. Nevada does not have a state office of secretary of education and the Board of Regents does not function as a cabinet department. The executive officer of the agency is appointed by the board and serves at the pleasure of the board.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

In January 1977, the Board of Regents adopted and sent to the legislature a comprehensive statewide plan for higher education in Nevada. The four-year (1977-81) plan will be reviewed and updated every two years thereafter.

1202 Commission

The Nevada Higher Education Commission has been designated by the governor as the 1202 commission for the state. The 12 members are appointed by the governor: 9 from the Board of Regents representing the general public as well as public four-year institutions and public community and junior colleges, 2 members representing proprietary institutions and 1 member representing the State Board of Education.

State Student Assistance and Loan Agencies

The University of Nevada System functions as the state student assistance agency, and Nevada participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education serves as the State Board of Vocational Education.

State-Level Organization for Private Colleges and Universities

Nevada does not have a state-level organization for private colleges and universities.

Licensure/Approval Agencies

The Commission on Postsecondary Education serves as the approval and licensing authority for private degree-granting, vocational-technical and proprietary institutions.

NEW HAMPSHIRE

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Board

The Postsecondary Education Commission, established in 1973, functions as the statutory coordinating agency for postsecondary education in the state. The commission is composed of 21 members, 7 appointed by the governor, 10 appointed by others and 4 in an ex officio capacity. Of the members, 5 each represent the general public, public institutions and private institutions, 3 members represent vocational-technical institutions and there are 3 students on the commission. The commission has statutory responsibility for planning and coordination for public senior and junior institutions, vocational-technical institutions and proprietary institutions. No postsecondary institution in the state may award a degree without approval by the commission. New Hampshire does not have an office of secretary of education and the Postsecondary Education Commission does not serve as a cabinet department. The executive officer of the commission is appointed by the commission.

Institutional Governing Boards

New Hampshire has 2 institutional governing boards: (1) the Board of Trustees of the University of New Hampshire system with statutory authority for 3 public senior colleges, and (2) the State Board of Education with statutory authority for 7 vocational institutions.

Master Planning

A master plan for postsecondary education in New Hampshire was issued in 1973. A new master plan on an on-going basis was formulated in 1977 and certain sections of it are updated periodically.

1202 Commission

The Postsecondary Education Commission has been designated by statute as the 1202 commission for the state.

State Student Assistance and Loan Agencies

The New Hampshire incentive program providing grants-in-aid for residents is administered by the Postsecondary Education Commission and New Hampshire participates in the federal state student grant program. The state has a state guaranteed loan program administered by the New Hampshire Higher Education Assistance Foundation under the federal insured loan program. The state also has medical, veterinary and optometric capitation and tuition loan programs.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

New Hampshire does not have a state-level organization for private colleges and universities.

Licensure/Approval Agencies

The Postsecondary Education Commission has approval and licensing authority for private degree-granting institutions. The State Department of Education has approval authority for technical-vocational schools and proprietary schools.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

The New Hampshire College and University Council consists of all four-year public and all but one four-year private degree-granting institutions in the state. Through the council, interinstitutional cooperation is made possible.

*Postsecondary Education Commission

NEW JERSEY

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Higher Education, established in 1967, is the statutory coordinating agency for postsecondary education in the state. The board consists of 18 members: 9 public members who are citizens appointed by the governor with the consent of the senate, 7 representing the sectors of the higher education institutions and 2 members who serve in an ex officio capacity. All public board members serve six-year terms of office. The board has statutory responsibility for coordination and planning for public two- and four-year institutions and independent institutions. In addition, the board has statutory responsibility for institutional budget review and making consolidated budget recommendations and program approval for public senior and junior institutions, aid to independent colleges and student financial aid. The chancellor of higher education is the head of the cabinet-level Department of Higher Education and is appointed by the Board of Higher Education with the approval of the governor for a five-year term.

Institutional Governing Boards

There are 29 governing boards for public institutions in the state of New Jersey. The Board of Governors of Rutgers University has statutory authority for that institution which is the public university. The Board of Trustees of the College of Medicine and Dentistry of New Jersey has statutory authority for the 3 medical schools, the dental school, the graduate school of bio-medical science and the school of allied health professions. The Board of Trustees of New Jersey Institute of Technology has statutory authority over that single institution. In addition, there are 16 individual county college boards each governing a single public two-year college, a county coordinating agency for higher education governing a county technical institute and a two-year county college, and 9 state college boards, each governing a single public senior college.

Master Planning

The Board of Higher Education is responsible for overall planning for the entire higher education system of the state. A new statewide plan, completed in late 1980 and adopted by the board in April 1981, provides a framework for both state and institutional planning. These simultaneous planning efforts are being coordinated by the Department of Higher Education, to which the individual institutions are submitting their own master plans, which include enrollment goals, student profiles and comprehensive mission statements. The objective of this phase of the planning process is to achieve congruency between the broad state perspective of the statewide plan and the specific activities of the individual institutions. The department, also in consultation with the institutions, is currently developing strategies for the implementation of selected goals of the plan. In addition, other planning activities, not specifically included in the newly adopted plan, are carried out on a continuing basis under the auspices of the Board of Higher Education in such areas as health manpower, the Educational Opportunity Fund, engineering and related technologies, capital construction and fine arts. Other postsecondary planning is in cooperation with the State Department of Education through the statutory Education Coordinating Council composed of the chairman/president of the 2 state boards, 1 citizen member from each, the chancellor of higher education and the commissioner of education. There are no formal requirements to involve groups in planning, but all plans have been developed with formally organized advisory groups from all concerned sectors.

1202 Commission

The Board of Higher Education was designated by the governor as the 1202 commission. The membership of the board is augmented by 3 representatives of noncollegiate-level vocational institutions when it operates as the 1202 commission.

State Student Assistance and Loan Agencies

The Department of Higher Education functions as the state student assistance agency and the state participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the Federal Guaranteed Student Loan Program.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Association of Independent Colleges and Universities in New Jersey serves as the statewide voluntary organization representing the 16 major independent colleges and universities.

Licensure/Approval Agencies

The Board of Higher Education functions as the approval and licensing agency for private degree-granting institutions, except 8 institutions established before 1887. The State Department of Education functions as the approval authority for technical-vocational and proprietary institutions. However, any postsecondary proprietary institutions seeking to offer degrees would come under the jurisdiction of the Department of Higher Education.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

As noted under the section on Master Planning, the statutory Education Coordinating Council functions to coordinate areas of overlap or joint interest between elementary-secondary and postsecondary education.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

The New Jersey Association of Colleges and Universities, with a staff and offices, has a membership representing both the public and private sector.

PART I: STATE STRUCTURE (CONTINUED)

Statutory Advisory Committees and/or Task Forces

The Council of State Colleges and the Council of County Colleges are charged with fostering communication among their respective institutions. The councils provide guidance, planning and program development in relation to the general policies of the Board of Higher Education; foster diversity of development among their colleges; and in general act as advisors to the board.

PART II: DESCRIPTIVE STATISTICS

Going to College in New Jersey: A Guide to Undergraduate Opportunities	Sept. 1980	Yes	Chancellor of Higher Education	Department of Higher Education	Contains institutional descriptive narrative, scholastic aptitude and demographic characteristics of the student body, and degree programs available at each college
Institutional Master Planning Student Profiles, 1975-1979	Oct. 1980	Yes	Board of Higher Education	Department of Higher Education, Office of Research & Manpower	Prepared to assist institutional planners; contains historical enrollment data by college by: age, sex, ethnicity, geographic origin, attendance status and level (undergraduate/post-baccalaureate)
An Inventory of Health Professions Education Programs in New Jersey, 1977-1982	Dec. 1980	Yes	Chancellor of Higher Education	Department of Higher Education, Office of Research & Manpower	An index of health occupational profiles, including information on work functions, employment sites, and educational, licensure, and certification requirements
Out-Migration of New Jersey Full-Time First-Time Freshmen, 1979: Analysis and Recommendations	July 1981	Yes	Chancellor of Higher Education	Department of Higher Education, Office of Research & Manpower	An analysis of in- and out-migration of freshmen, to and from N.J., in terms of type of institution attended and state (in the case of out-migrants). Fiscal and enrollment consequences of N.J.'s high net export of students are examined, and recommendations for further research to address the situation are made

PART IV: SPECIAL STUDIES AND REPORTS CURRENTLY UNDERWAY OR PLANNED (CONTINUED)

Special reports and studies expected to be completed, underway or planned from September 1980 to September 1981.

TITLE	EXPECTED COMPLETION DATE	IS THIS AVAILABLE FOR DISTRIBUTION?	REQUESTED BY WHOM	AGENCY COMPLETING THE REPORT	ISSUES AND AREAS CONCERNED IN REPORT
Report of the Committee on Dental Auxiliaries of the Health Professions Education Advisory Council	May 1981	Yes (limited)	Chancellor of Higher Education, Board of Dentistry	Department of Higher Education, Office of Health Professions Education	Development of educational guidelines to ensure standards of proficiency for dental auxiliaries performing expanded duties
Report of the Nursing Committee of the Health Professions Education Advisory Council on Educational Mobility and Articulation Between Associate Degree and Diploma Schools of Nursing into Baccalaureate Programs in Nursing 1977-1980	April 1981	Yes (limited)	Chancellor of Higher Education	Department of Higher Education, Office of Health Professions Education	Follow-up on implementation of policies recommended in October 1979 on subject
Statewide Plan for Higher Education	Sept. 1981	Yes	Board of Higher Education	Department of Higher Education, Director, Board of Higher Education Activities	Indicated by title
Study of Part-Time Students' Financial Aid Needs	Aug. 1981	Yes	Department of Higher Education	Department of Higher Education, Office of Student Assistance	Study of part-time students receiving financial assistance and the potential for including them in state assistance programs
Tuition and Required Fees, New Jersey Colleges and Universities 1976-77 Through 1980-81	Feb. 1981	Yes	Chancellor of Higher Education	Department of Higher Education, Office of Research & Manpower	Current levels of tuition/required fees and increases over the five-year period analyzed with respect to differences among collegiate sectors and student type, and in other contexts, such as inflation and charges in other states.

NEW MEXICO

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Educational Finance, established in 1951, functions as the state coordinating agency for postsecondary education. Its structure and responsibility were amended in 1967 and again in 1973. The board consists of 13 members, 11 representing the general public and appointed by the governor to serve six-year terms of office, and 2 members representing the students who are appointed by the governor to serve one-year terms as ex officio members. The board has statutory responsibility for planning and coordination for all sectors of postsecondary education (public senior, junior, vocational-technical, private and proprietary). In addition, the agency has statutory responsibility for budget review and recommendation for public senior and junior institutions and for program approval for new graduate programs in public senior colleges.* The Board of Educational Finance is not a cabinet department and the executive officer of the board is appointed by and serves at the pleasure of the board.

Institutional Governing Boards

There are 11 institutional governing boards in the state: the statutory board of Albuquerque Technical-Vocational Institute and board of Luna Area Vocational School, each for a single vocational institution, and the board of New Mexico Junior College, a public junior college; and the constitutional regents of (1) New Mexico Military Institute and Northern New Mexico Community College, each for a single public junior institution; (2) the University of New Mexico governing 3 public junior institutions and one public senior college; (3) New Mexico Highlands University, Western New Mexico University, and New Mexico Institute of Mining and Technology, each with authority over a senior public institution; (4) New Mexico State University governing five public junior institutions and a public senior institution; and (5) Eastern New Mexico University governing two public junior institutions and one public senior college.

Master Planning

A master planning effort is being implemented.

1202 Commission

The Board of Educational Finance has been designated by statute as the 1202 commission. The board's membership was not augmented when it became a 1202 commission.

State Student Assistance and Loan Agencies

The Board of Educational Finance is responsible for state student assistance programs and the state participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Council of Independent Colleges and Universities of New Mexico functions as the state-level organization for 3 private colleges and universities.

Licensure/Approval Agencies

The Board of Educational Finance has approval and licensing authority for private and proprietary schools. The State Department of Education has approval authority for public vocational-technical and area vocational schools.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The 21-member New Mexico Coordinating Council includes representation from all segments of education, including elementary-secondary, and serves in an advisory capacity to the Board of Educational Finance in its role as the 1202 commission.

Statutory Advisory Committees and/or Task Forces

See New Mexico Coordinating Council in paragraph above.

---

*In a sense the 1973 statute gives the board this responsibility for all postsecondary education.

NEW MEXICO

NEW YORK

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The University of the State of New York consists of all elementary, secondary and postsecondary educational institutions which are incorporated in the state and other libraries, museums, institutions, schools, organizations and agencies for education as may be admitted to or incorporated by the university. The term "university" as used here is a broad term encompassing all the institutions offering education in the state. The university is empowered to charter, register and inspect educational institutions; to license and supervise the professional conduct of practitioners in nearly all the professions; to certify teachers and librarians; and to apportion certain state financial assistance to public and private educational institutions.

The Regents of the University of the State of New York, established by the legislature in 1784, are responsible for the general supervision of and setting of policy for all educational activities within the state and preside over the university and the State Education Department. The regents and the university are established under the state constitution, and the 15 regents are elected by the legislature, 1 from each of the state's 11 judicial districts plus 4 elected at large, for terms of 7 years without pay. The chancellor and vice chancellor are elected from among their number by a majority of the regents and the regents have legislative, executive and judicial powers. The regents and the department have authority and responsibility for planning and coordination, degree powers and program approval for all sectors and levels of postsecondary education, including all degree-granting institutions. The president of the University of the State of New York is appointed by the regents and serves at their pleasure. The president serves also as the commissioner of education, the chief executive officer of the State Education Department whose duties are both executive and judicial.

Institutional Governing Boards

There are two statutory public institutional governing boards in the state -- the Board of Trustees of the State University of New York (35 junior institutions and 29 senior institutions) and the Board of Trustees of The City University of New York (7 junior and 11 senior institutions).

Master Planning

In October 1980 the regents adopted the fifth regents Statewide Plan for the Development of Postsecondary Education. The 1980 plan stated the regents' four goals for postsecondary education: excellence, access, diversity and effective use of resources. At the center of the plan are 13 objectives for the year 1990, designed to direct efforts of the higher educational community toward the goals in measurable fashion. In addition, the plan lists statewide activities which will be undertaken during the next four-year planning period to move the state's postsecondary system toward the longer term objectives for 1990.

1202 Commission

The Board of Regents of the University of the State of New York has been designated by the governor as the 1202 commission. Its membership was not augmented.

State Student Assistance and Loan Agencies

The New York State Higher Education Services Corporation serves as the state student assistance agency and New York participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The regents are considered to be the State Board of Vocational Education, since the federal government empowers them to administer funds and programs under the Vocational Education Act.

State-Level Organization for Private Colleges and Universities

The Commission on Independent Colleges and Universities serves as the state-level organization for 105 private institutions.

Licensure/Approval Agencies

The Regents of the University of the State of New York is the approval and authority agency for all institutions in the state.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

In addition to internal activities concerning communication and articulation in the State Education Department, many schools and colleges have local or regional articulation programs in operation.

Related Nongovernmental Organizations with Staffs and Programs -- Representing Both Public and Private Institutions

There are two nongovernmental organizations in New York with memberships representing both the public and private sectors: the Association of Colleges and Universities of the State of New York and the New York State Association of Junior Colleges.

Statutory Advisory Committees and/or Task Forces

Statutory boards or committees currently operating are the State Boards for the Professions, with regulatory and licensure authority and whose executive secretary for each board is a staff member of the State Education Department. Under state law, the regents have the authority to establish boards, task forces or advisory committees and at the present time a number of these groups are serving in an advisory and consultative capacity to the regents and/or the commissioner of education.

NORTH CAROLINA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Governors of The University of North Carolina was redefined, effective July 1, 1972, in order to foster the development of a well-planned and coordinated system of higher education in North Carolina, to improve the quality of education, to extend its benefits and to encourage an economical use of the state's resources. The board is composed of 32 members, 8 of whom are elected by the legislature every 2 years. Each group of 8 must include a minimum of 1 woman, 1 member of a minority race and 1 member of the party which constitutes the minority in the legislature. All 32 members, serving 8-year terms of office, are deemed members-at-large, charged with the responsibility of serving the best interests of the whole state. The board has statutory authority for planning and developing a coordinated system of higher education including public junior, senior, vocational and technical and private institutions. It also functions as the statutory governing agency for 16 senior public institutions in the state and administers statewide federal or state programs that provide aid to institutions or students of postsecondary education through an agency, except those related exclusively to the Community College System. In addition, the board has statutory authority for program approval and making consolidated budget recommendations for public senior institutions. The chief administrative officer of the university, the president, is elected by the board and serves at the pleasure of the board. North Carolina does not have an office of secretary of education, and the Board of Governors does not serve as a cabinet department but gives advice and recommendations concerning higher education to the governor, the General Assembly, the Advisory Budget Commission and the boards of trustees of the institutions.

Until January 1981, the State Board of Education had statutory authority for 23 community colleges and 35 technical institutes. The General Assembly at its 1979 session, however, created the State Board of Community Colleges and Technical Institutes and provided that, effective January 1, 1981, full authority for the government of the community college system will shift from the State Board of Education to that new board. The new State Board of Community Colleges and Technical Institutes consists of 19 members: the lieutenant governor and the state treasurer, who shall serve ex officio; one person appointed by the governor from each of six community college trustee association regions defined in the statute; four people appointed by the governor from the state at large; and "the General Assembly by joint resolution shall select seven persons from the state at large and the governor shall appoint these persons to membership on the State Board. . . ." The State Board of Community Colleges and Technical Institutes is authorized to establish a State Department of Community Colleges and to adopt and administer necessary policies, regulations, and standards for the establishment and operation of that department. The State Board also elects the state president of the Community College System, who is the chief administrative officer of the department. Provision is made for the staff of the Department of Community Colleges. An Advisory Council to the State Board is also prescribed.

Institutional Governing Boards

Under the statute creating the Board of Governors, a 12-member board of trustees, with the president of the student government of the institutions as an ex officio member, was provided for each of the 16 senior public institutions. Responsibilities are largely delegated by the Board of Governors. Each community college and technical institute is governed by a board of trustees consisting of 13 members, with the president of the student government or the chairman of the executive board of the student body of each community college and technical institute as an ex officio, non-voting member of the board of trustees of each institution.

Master Planning

In April 1976, the Board of Governors adopted a long-range (1976-1981) plan for the University of North Carolina, based largely on five-year plans submitted by each of the 16 institutions. The university plan defined the academic role of each of the institutions, authorized the planning of requested academic programs, provided for the annual revision of the plan and initiated a systematic review of all current degree programs offered by the constituent institutions.

A second edition of the long-range plan was published in Nov. 1977, extending the planning period to 1977-1982. This edition devoted particular attention to the public service programs of the university. A third edition of the long-range plan was published in December 1978, extending the planning period to 1978-1983. The fourth edition of the plan for the period 1980-1985 was adopted February 13, 1981. Much of the material included in this edition of the plan appeared in the first, second, and third editions of the plan, but the sections of the plan have been rearranged and outdated material has been eliminated. Of particular interest will be the Academic Program Plans for the 16 campuses of The University of North Carolina, found in Chapter IV of the long-range plan.

1202 Commission

A 1202 commission has not been designated in the state of North Carolina.

State Student Assistance and Loan Agencies

The North Carolina Education Assistance Authority functions as the state student assistance agency and North Carolina participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education functions as the State Board of Vocational Education. Effective January 1, 1981, its authority concerning postsecondary vocational education, however, within discretionary limits, requires concurrence of the State Board of Community Colleges and Technical Institutes.

PART I: STATE STRUCTURE (CONTINUED)

State-Level Organization of Private Colleges and Universities

The North Carolina Association of Independent Colleges and Universities is the state-level voluntary membership organization for 38 private colleges and universities in the state of North Carolina.

Licensure/Approval Agencies

The Board of Governors of The University of North Carolina functions as the agency for licensing nonpublic educational institutions to grant degrees. The State Board of Education functions as the approval authority for nondegree postsecondary programs in educational institutions.

NORTH CAROLINA

NORTH DAKOTA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Higher Education, established in 1939, functions as the constitutional governing agency for 2 public universities, 1 public university two-year branch, 4 public state colleges and 1 two-year public liberal arts and trade-technical institution. The board consists of 7 members appointed by the governor with the consent of the senate, all 7 representing the general public and serving seven-year terms of office. In 1977 a nonvoting student member was provided by statute. Three candidates are recommended by the state student association for a one-year term. The board conducts planning and coordination activities for public senior and junior institutions and the liberal arts trade-technical institution both as a matter of policy and with constitutional and statutory authority. In addition, the board has statutory program approval authority and statutory responsibility to review institutional budgets and make consolidated budget recommendations for public junior and senior institutions. The state does not have an office of secretary of education and the board does not function as a cabinet department. The executive officer of the board is appointed by the board for a three-year term of office. No separate public institutional governing boards exist in the state.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

Information concerning the status and scope of master planning for postsecondary education in North Dakota is available through the Postsecondary Education Commission.

1202 Commission

The Postsecondary Education Commission was established by statute in 1977. The membership includes the Board of Higher Education (7), the State Board of Public School Education (7) and one representative from school district-organized junior colleges, one representative from private higher education and one representative from proprietary education. These seventeen members make up the North Dakota state agency for most federal title programs as designated by the governor.

State Student Assistance and Loan Agencies

The North Dakota Student Financial Assistance Program is the state student assistance agency and North Dakota participates in the federal state student incentive grant program. The state does not have a state guaranteed loan program, although the Bank of North Dakota, a state-owned and operated bank, participates fully in the federal insured loan program. The Student Financial Assistance Program also administers the Tuition Assistance Grant (TAG) Program. TAG is a program of grants, based on need to students attending private, four-year and liberal arts colleges.

State Board of Vocational Education

The State Board of Public School Education serves as the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The North Dakota Council of Independent Colleges functions as a state organization for 3 private colleges in the state.

Licensure/Approval Agencies

The State Board of Vocational Education functions as the approval authority for vocational-technical proprietary institutions and confers with the Commission of Higher Education for official approval of academic institutions desiring to offer programs or courses in the state.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

There are no formal articulation committees; however, by law the Board of Higher Education and the Board of Public School Education meet together at least once a year.

OHIO

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Ohio Board of Regents, established in 1963, serves as the statutory coordinating agency in the state. The board consists of 11 members serving nine-year terms of office, with 9 members representing the general public and appointed by the governor with the consent of the senate and 2 members (chairperson of house and senate education committees) serving in an ex officio capacity. The board has statutory authority for planning and coordination for private institutions and public senior, junior and technical institutions. In addition, the board as the designated 1202 agency also considers proprietary institutions in planning. The board has statutory responsibility to review institutional budgets, review and make recommendations for a consolidated budget and approve programs for public senior and state junior colleges. The state does not have an office of secretary of education and the board does not serve as a cabinet department. The chancellor, executive officer of the board, is appointed by and serves at the pleasure of the board.

Institutional Governing Boards

The statutory institutional governing boards in the state are as follows: the Boards of Trustees of Bowling Green State University, the University of Akron and Wright State University, each governing 1 public junior and 1 senior college; the Boards of Trustees of Central State University, Cleveland State University, the University of Toledo and Youngstown State University, each governing a single senior public institution; the Boards of Trustees of Ohio University and Ohio State University each responsible for 1 senior institution and 5 public junior institutions; the Board of Trustees of Kent State University with 7 public junior institutions and a single public senior institution; the Boards of Trustees of the University of Cincinnati and Miami University each with 2 public junior institutions and a single public senior institution. There are 5 community colleges governed by boards representing the state and county, 16 technical institutes governed by boards representing the state and local school taxing districts and 3 state community colleges with state-appointed boards of trustees. The Medical College of Ohio at Toledo is an independent institution with a separate governing board. There also has been created by statute the Northeastern Ohio Universities College of Medicine with a 9-member board of trustees consisting of the presidents of the 3 participating universities, a member from each board of the participating institutions and a person appointed by each university board.

Master Planning

Data and recommendations were collected from several groups within and outside the higher education system for preparation of Ohio's third higher education master plan, which was published in the fall of 1976. The 1976 master plan incorporated the findings and recommendations of major studies authorized by the Board of Regents including the report of an ad hoc committee studying student financial aid problems, the graduate program policy advisory committee's survey of graduate education, a study of veterinary medical needs and the recommendations of the advisory committee on service to physically handicapped students calling for improving access of physically handicapped persons to higher education in Ohio. The fourth master plan is currently under development with an expected publication date of December 1981. The regents published a policy statement on private higher education in the state to review state assistance to private nonprofit institutions. A number of policy guidelines to be followed by the board concerning access, quality, planning and student aid for private institutions were adopted.

1202 Commission

The Board of Regents has been designated by the governor as the state 1202 commission. The membership of the board was not augmented when it became a 1202 commission. The board has appointed a 15-member advisory committee representing postsecondary education to assist it in this role.

State Student Assistance and Loan Agencies

The Board of Regents' student assistance office serves as the state student assistance agency and Ohio participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program administered by the Student Loan Commission.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Association of Independent Colleges and Universities of Ohio serves as the organization for 42 private colleges and universities in the state.

Licensure/Approval Agencies

The Board of Regents has approval and licensing authority for the state's private degree-granting institutions. The Department of Education approves vocational-technical schools and proprietary schools are approved by the Board of School and College Registration.

Related Nongovernmental Organization With Staffs and Programs -- Representing Both Public and Private Institutions

The Ohio College Association is the statewide organization representing both public and private institutions.

Subsidy Formula Revision	Jan. 1981	Yes	Board of Regents	Ohio Board of Regents, Public Information	Describes recent revisions to Ohio's method of financing instructional programs at state-assisted colleges and universities

OKLAHOMA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The State Regents for Higher Education, established by constitutional amendment in 1941, is the coordinating agency for all postsecondary education in Oklahoma. The membership of the regents is set by the constitution at 9 members, appointed for nine-year overlapping terms by the governor with the consent of the senate, all representing the general public. The regents have constitutional responsibility for prescribing standards, determining the functions and courses of study, granting degrees, setting fees, determining budget needs and making budget allocations to all public institutions of higher education, both senior and junior. In addition, the regents have constitutional authority for planning and coordination of all postsecondary institutions, both public and private. Oklahoma does not have an office of secretary of education and the regents do not function as a cabinet department. The executive officer of the regents is appointed by the regents and serves at their pleasure.

Institutional Governing Boards

Oklahoma's public institutions of higher education are operated by 17 governing boards, 3 of which are constitutional and 2 of which govern more than 1 institution. The constitutional boards are the Board of Regents of the University of Oklahoma, the Board of Regents of Oklahoma Colleges which governs 6 senior institutions and the Board of Regents for the Oklahoma Agricultural and Mechanical Colleges which governs Oklahoma State University, 3 public senior colleges and 2 public junior colleges. With the exceptions as noted above, all other public institutions of higher education have separate and independent statutory governing boards.

Master Planning

In July 1980, the State Regents for Higher Education adopted a long-range planning document entitled Oklahoma Higher Education: Planning for the 1980's. This publication addresses the issues likely to be faced by Oklahoma higher education in the decade and provides a mechanism for continuous planning and review, utilizing both state regents' staff and personnel from state system institutions to develop policy recommendations for the regents' consideration. The regents created an Office for Planning and Policy Research within the agency, headed by a Vice Chancellor with the responsibility of coordinating the planning efforts. Four permanent planning councils on instruction, graduate education and research, extension and public service and finance and budgeting have been formed. Provision was also made for ad hoc groups to address specific problem areas and once such group has been formed, a Task Force on Teacher Education.

1202 Commission

The State Regents for Higher Education was designated by the governor as the state 1202 commission. The membership of the regents was not augmented when it became the 1202 commission.

State Student Assistance and Loan Agencies

The State Regents function as the state student assistance agency operating a variety of student assistance programs. Oklahoma participates in the federal state student incentive grant program through the Oklahoma tuition aid grant program. The state also has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Vocational Education is the State Board of Vocational and Technical Education, which is independent of the State Board of Education.

State-Level Organization of Private Colleges and Universities

The Oklahoma Association of Independent Colleges and Universities is the state organization for 11 private colleges and universities.

Licensure/Approval Agencies

The State Regents for Higher Education function as the approval and licensing agency for private degree-granting institutions in the state. The Department of Vocational and Technical Education has approval authority for secondary-level vocational-technical institutions and the Oklahoma Board of Private Schools has approval authority for proprietary institutions.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

The Higher Education Alumni Council and staff serve representatives from public and private postsecondary education in the state.

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Educational Coordinating Council, established in 1963 and amended most recently in 1975 as the Educational Coordinating Commission, serves as the statutory coordinating agency for all of education in the state. The new commission consists of 7 lay members appointed by the governor with senate confirmation. The new law requires that none of the commission be members of governing boards or be employed by or be operators of a public or private education agency or institution. With respect to postsecondary education, the commission has statutory authority to review all proposed new and existing programs and locations for consistency with statewide policy and program objectives. The commission has final authority for approval or disapproval of new publicly operated programs having a significant adverse impact on more than one segment of education. The commission has had transferred to it from the Board of Education the responsibility to approve degree-granting authority. The commission also has a budget review responsibility to assess the budgetary priorities of the educational segments and to make recommendations to the governor and the legislature prior to their action on the budget requests. Oregon does not have an office of secretary of education and the commission is not a cabinet department. The executive officer of the commission is appointed by the commission and serves at its pleasure.

Institutional Governing Boards

There are two institutional governing boards in the state -- the State Board of Education with statutory authority for the supervision and regulation of 13 community colleges, each of which has its own elected governing board, and the State Board of Higher Education with statutory authority for 8 public senior institutions.

Master Planning

The Coordinating Commission has statutory authority to develop, adopt and maintain a comprehensive education plan and related policy objectives, which include statewide educational goals and indicators appropriate for evaluating the effectiveness of all aspects of education from kindergarten through post-graduate programs. The Board of Education and the Board of Higher Education are directed to cooperate with the commission in this procedure. The commission is also to maintain a central data base, to identify educational needs and expectations, to require each postsecondary governing board to submit a long-range plan and to review and coordinate such plans.

1202 Commission

The Educational Coordinating Commission has been designated by the governor as the 1202 commission for the state. The membership of the commission was not augmented when it became the 1202 commission.

State Student Assistance and Loan Agencies

The Oregon State Scholarship Commission functions as the state student aid agency and Oregon participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education functions as the State Board of Vocational Education and is responsible for all designated two-year postsecondary schools, including the 13 comprehensive community colleges.

State-Level Organization of Private Colleges and Universities

The Oregon Independent Colleges Association serves as the state organization for 16 private colleges and universities.

Licensure/Approval Agencies

The Educational Coordinating Commission has approval and licensing authority for private degree-granting institutions. The State Board of Education has approval authority for vocational-technical and proprietary institutions.

Statutory Advisory Committees and/or Task Forces

The Educational Coordinating Commission is required by statute to appoint an advisory committee representing all segments of education, including administrators, students and faculty. The committee is to assist the commission in identifying the issues, problems and alternative solutions that are critical to the effective coordination of education.

PART II: DESCRIPTIVE STATISTICS

*Oregon Educational Coordinating Commission

PENNSYLVANIA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The State Board of Education, created by the General Assembly in 1963, is organized into two councils having members appointed by the governor with the advice and consent of the senate for overlapping terms of six years. Of the board's 17 members, 8 serve as members of the Council of Basic Education and 8 as members of the Council of Higher Education with the chairman of the board serving on both councils. The board is representative of the general public and the public and private institutions of postsecondary education. There is a statutory office of secretary of education and the State Department of Education is a cabinet-level coordinating/governing agency having statutory authority for planning and coordination for Pennsylvania's postsecondary education sectors consisting of 13 state colleges, 1 state university and 3 state branch campuses; 4 state-related universities with 25 branch campuses; 14 community colleges; 117 independent colleges and universities, including 10 junior colleges and 12 state-aided institutions; and 55 specialized associate degree-granting institutions, including one state school of technology. The executive officer of the department, the secretary of education, is appointed by the governor and serves at his pleasure. The state college and university system is governed by the Board of State College and University Directors subject to the rules and regulations of the State Board of Education.

The State Board of Education reviews policies, standards, rules and regulations formulated cooperatively by the councils and the department; adopts broad policies and principles and establishes standards governing education in the state; and annually reviews the budget requests of the department and of the educational institutions financed wholly or in part from state appropriations, recommending approval or disapproval to the governor and the legislature. The Board of State College and University Directors reviews budget requests and program proposals from the state-owned institutions, recommending approval or disapproval to the secretary of education, who has final statutory authority for budget and program approval. The State Department of Education recommends to the governor budgets of other publicly supported institutions -- state-related, state-aided and community colleges -- and has limited program approval responsibilities for these and all other segments of higher education.

Institutional Governing Boards

In addition to the Board of State College and University Directors, noted in the section above, the other institutional governing boards are the following (not including the nonstate-supported private institutions). The Board of Trustees of Pennsylvania State University has authority for the university and its 20 branch campuses. The Board of Trustees of the University of Pittsburgh has responsibility for the university and 4 branch campuses. The Boards of Trustees of Temple and Lincoln Universities have authority for their respective institutions. Boards of trustees for 14 community colleges have authority for these institutions.

Master Planning

Pennsylvania has developed three master plans. The first in 1966 was concerned with enrollments, programs and finances in the public sector. The 1971 plan included both state-supported and independent institutions, and was problem-oriented with attention directed toward specific issues in higher education. The third plan, approved by the State Board of Education in November 1978, is based upon the work of six task forces dealing with major issues through three graduated planning phases.

Essential to master planning in the Commonwealth of Pennsylvania is the cooperative interaction of the eight autonomous regional coordinating councils for higher education, all of which have State Board recognition. The councils' voluntary coordination and exchange of information underscores the integral character of postsecondary education in Pennsylvania and emphasizes its dependence upon voluntary cooperation among public and independent institutions in their collective efforts to serve the citizens of the Commonwealth.

1202 Commission

The Pennsylvania postsecondary education planning commission (1202 commission) is composed of the 8 members of the State Board of Education's Council of Higher Education. This is consistent with statutory responsibility vested in the State Board by the General Assembly.

State Student Assistance and Loan Agencies

The Pennsylvania Higher Education Assistance Agency serves as the state's central agency for the administration of the following student financial assistance related programs: State Higher Education Grant (Scholarship) Program; State Student Loan Guaranty Program under the federal guaranteed student loan program; State Institutional Assistance Grants Program; Federal State Student Incentive Grant Program; State-Wide Summer College Work-Study Program; and Parent Loans for Undergraduate Students.

State Board of Vocational Education

The State Board of Education functions as the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Commission for Independent Colleges and Universities of Pennsylvania serves as the state organization for 77 private colleges and universities.

PART I: STATE STRUCTURE (CONTINUED)

Licensure/Approval Agencies

The State Department of Education has licensing authority for all postsecondary proprietary institutions. The department also has charter authority and approval over all new postsecondary education degree-granting institutions.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

"Project 81," a program to equip students in a better way with the competencies they need to function successfully as adults, coordinates various voluntary committees. Other related agencies are the Inservice Councils for inservice education of teachers.

The Higher Education Advisory Committee on School Improvement was convened by the Commissioner of Higher Education to advise on a college or university role in school improvement and on the process for redesigning professional education and certification. School improvement is a statewide effort by the department to promote growth in elementary and secondary school student learning and to redesign the ways in which educators are prepared and certified. The advisory committee has representatives from three college/university sectors, four teacher education organizations, the Pennsylvania State Education Association, the Pennsylvania Federation of Teachers and the intermediate units.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

The Pennsylvania Association of Colleges and Universities, with 116 members, represents both public and private institutions. In addition, the 8 regional planning councils, noted in the section on Master Planning above, serve both the public and private sector.

Statutory Advisory Committees and/or Task Forces

The Professional Standards and Practices Commission advises the board in three areas of professional practices: standards for certification of educators, standards of professional practices and procedures of due process with regard to suspension, annulment or revocation of professional certificates.

The Pennsylvania Advisory Council on Vocational Education was created pursuant to the 1968, 1972 and 1976 Vocational Education Amendments. The governor appoints individuals to the council for one-year terms; normally individuals serve for three terms. The council advises the State Board of Education on the development of the State Plan and Accountability Report and on policy matters in the administration of the State Plan. Additionally, the council is responsible for evaluating vocational programs, services and activities, for publishing the evaluation results and for preparing an annual report.

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Governors for Higher Education, established in 1981, serves as the statutory governing agency for the Community College of Rhode Island, Rhode Island College and the University of Rhode Island. The Board of Governors consists of 11 members: 8 appointed by the governor to serve on this board, the chairperson of the Board of Regents for Elementary and Secondary Education (also appointed by the governor), and the chairpersons of the senate and house finance committees. Public members serve a three-year term of office; they may be reappointed to a second term. Among the powers and duties of the board are these: higher education information system; master planning; capital development; general supervision over public higher education; consolidated budget recommendation; institutional role determination; and instructional program approval. The executive officer of the board is the commissioner of higher education who is appointed by the board with the approval of the governor and serves at the pleasure of the board. The board maintains an office of higher education. There is a Board of Regents for Elementary and Secondary Education and a Public Telecommunications Authority. Prior to 1981 the responsibilities of this board and authority, together with those of the Board of Governors, were vested in a single Board of Regents for Education.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

Master planning activities in Rhode Island are among the responsibilities of the Board of Governors for Higher Education. A statement of purposes for postsecondary education in Rhode Island was adopted in 1978. Several master planning activities are continuous: program approvals, coordination of public higher education, refinement of information collection and dissemination and enrollment forecasting.

1202 Commission

In July 1974, the governor established, by executive order, the Rhode Island Postsecondary Education Commission (1202 commission). The commission has been designated by the governor as the entity authorized to act in behalf of the state for the purpose of entering into agreements to comply with Section 1203 of the Higher Education Act. The commission is comprised of members of the Board of Governors for Higher Education and representatives of the postsecondary education community in Rhode Island. The commissioner of higher education serves as the chief executive officer.

State Student Assistance and Loan Agencies

Student assistance programs are administered by the Rhode Island Higher Education Assistance Authority. This office serves as the state student assistance agency and is the state guarantor under the federal insured loan program. Rhode Island participates in the federal state student incentive grant program.

State Board of Vocational Education

The Department of Elementary and Secondary Education serves as the State Board of Vocational Education.

Licensure/Approval Agencies

The Board of Governors for Higher Education has approval and licensing authority for private degree-granting institutions and approval authority for proprietary institutions.

RHODE ISLAND

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Commission on Higher Education was established in 1967 as the statutory coordinating agency for higher education. The General Assembly in 1978 adopted amendments to the enabling legislation, the chief effect of which was to restructure the membership of the commission. Under the amendments, the commission consists of 18 members appointed by the governor, 3 from each of the state's congressional districts. Of these, 2 from each district are appointed with the advice and consent of the legislative delegations within the district, and 1 from each district is appointed on nomination by the legislative delegations within the district. Terms of office are four years, and no member may serve more than two consecutive terms. The chairman is elected for one-year terms by the members, and may not serve as chairman more than four consecutive years.

Other amendments adopted in 1978 require the commission to submit to the General Assembly within one year a master plan for higher education; add to the commission's responsibility to approve new programs in public institutions the authority to recommend to any of the public institutions' governing boards the termination of an existing program; and require the commission to review, modify as necessary and present to the General Assembly appropriations requests from the State Board for Technical and Comprehensive Education in the same manner as required for other institutions. The executive officer of the commission is appointed by and serves at the pleasure of the commission. South Carolina government is not organized into cabinet-level departments, and there is no office of secretary of education.

Institutional Governing Boards

The 8 institutional governing boards include boards of trustees for Clemson University, the Medical University, South Carolina State College and Winthrop College and the Board of Visitors for the Citadel, each governing a single institution, the Board of Trustees of the University of South Carolina which governs 4 senior and 5 two-year branches, the State College Board of Trustees which governs 3 senior institutions and the State Board for Technical and Comprehensive Education which governs 16 two-year technical education institutions.

Master Planning

The 1978 amendments require the commission to prepare and maintain a master plan for all postsecondary education. The plan was approved by the General Assembly on April 2, 1980, and must be reviewed annually by the commission.

State Student Assistance and Loan Agencies

A Higher Education Tuition Grant Committee, consisting of eight representatives of private nonprofit postsecondary institutions and two legislators serving ex officio, administers a state-supported grant program for students at private institutions. The committee also administers the state's participation in the federal state student incentive grant program. Members of the State Budget and Control Board function as the State Education Assistance Authority to administer funds made available for student loans through the sale of revenue bonds. The authority contracts with the South Carolina Student Loan Corporation, a state-chartered lending agency privately established for the purpose of administering the program.

State Board of Vocational Education

The State Board of Education is designated the State Board of Vocational Education and as such governs 55 vocational education centers. Vocational-occupational education programs are also conducted by the 16 technical educational institutions and by many junior and senior public and private colleges. Coordination by the State Board of Vocational Education with the commission is voluntary.

State-Level Organization of Private Colleges and Universities

The South Carolina College Council functions as the organization for the private colleges and universities in the state. The South Carolina College Foundation, originally organized as a fund-raising organization, consists of a portion of the members of the council.

Licensure/Approval Agencies

The General Assembly in 1977 adopted legislation requiring state licensure of private degree-granting institutions established in the state since 1953, except for theological schools and requiring the commission to execute the licensing authority. The legislation also requires licensure of in-state offerings by public or independent institutions located elsewhere. The State Board of Education retains authority to license proprietary institutions which do not award degrees (associate or higher) and to carry out approval functions required by the Veterans Administration.

Statutory Advisory Committees and/or Task Forces

An advisory council of public college and university presidents and an advisory council of private college presidents were created by the 1967 act, as amended, to meet with and submit recommendations to the Commission on Higher Education. Both councils are involved in the comprehensive planning conducted by the commission.

*State Board for Technical and Comprehensive Education

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

In 1973, under executive order, a cabinet department of education and cultural affairs for all public education was established. The department is headed by a secretary of education and cultural affairs who is appointed by and serves at the pleasure of the governor. The department includes 3 education divisions: elementary and secondary education, vocational-technical education and higher education. The secretary is responsible for planning, coordination and budget review and for making recommendations to the governor for budgets for all the education divisions. In the 1979 legislative session an executive order was issued placing personnel in elementary-secondary education and vocational education under the control of the secretary of education and cultural affairs.

The Board of Regents serves as the constitutional governing body for the seven public colleges and universities, a school for the deaf and a school for the visually handicapped. The board was expanded by statute to include nine voting members and one student representative appointed by the governor with senate confirmation to serve six-year terms of office (the student serves for two years). There are no public junior colleges in the state. The executive officer of the Board of Regents is appointed by and serves at the board's pleasure.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

The Planning Bureau, a cabinet-level agency, is responsible for developing long-range plans for all of state government in South Dakota. A planning commission, an advisory board to the secretary of education and cultural affairs (also serves as the 1202 commission), coordinates the plans for the divisions under its jurisdiction. It also attempts to coordinate the private and proprietary plans with those of the public sector. Each public institution participates in the planning at all stages of development.

1202 Commission

The Planning Commission under the Department of Education and Cultural Affairs was designated by executive order as the 1202 commission. The Planning Commission is composed of a total of thirteen members, seven representing the general public and one member each representing public four-year institutions, public vocational-technical institutions, private nonprofit institutions and proprietary institutions. In addition, there is one representative each from the State Board of Education, the Board of Regents and the State Board of Vocational Education.

State Student Assistance and Loan Agencies

The Office of the Secretary of Education and Cultural Affairs serves as the state student assistance agency. The Education and Cultural Affairs Planning Commission may enter into agreements to implement the provisions of the guaranteed student loan program for higher education under the provisions of the Higher Education Act of 1965, Title IV-B as amended.

State Board of Vocational Education

The State Board of Vocational Education comprises one of the three divisions within the Department of Education and Cultural Affairs. It includes both secondary and postsecondary vocational education.

State-Level Organization of Private Colleges and Universities

The South Dakota Association of Private Colleges serves as a state organization for seven private colleges and universities in the state.

Licensure/Approval Agencies

The postsecondary regulatory authority is granted to the Secretary of Education and Cultural Affairs with licensing and approval authority for postsecondary educational institutions.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The South Dakota Post High School Coordinating Council is a voluntary organization with a full-time executive secretary to coordinate and articulate activities of the secondary schools and the postsecondary sector of all types.

South Dakota Task Force on Review of Postsecondary Vocational Education	Oct. 1980	Yes	Secretary of Education and Cultural Affairs	Secretary of Education and Cultural Affairs	Governance and finance of postsecondary vocational education in South Dakota

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Higher Education Commission, established in 1967 and amended in structure and responsibility in 1973, 1974, 1975, 1976, 1977, 1978 and 1980 serves as the statutory coordinating agency for postsecondary education in Tennessee. The THEC consists of 9 members, representative of the general public, appointed by the governor for a nine-year term of office. The THEC has statutory responsibility for planning and coordination for public junior and senior institutions and technical institutes, and conducts planning and coordination activities as a matter of policy for those institutions as well as for private institutions. As a matter of policy, and with statutory authority, the THEC reviews institutional budgets and reviews and makes budget recommendations for public junior and senior institutions and technical institutes. In addition, the THEC has statutory authority to approve programs for public junior and senior institutions and technical institutes. Tennessee does not have an office of secretary of education and the THEC does not serve as a cabinet department. The executive officer of the THEC is appointed by the THEC and serves at the pleasure of the THEC.

Institutional Governing Boards

There are 2 primary institutional governing boards in the state: (1) the Board of Regents of the State University and Community College System which exercises statutory responsibility for 10 junior and 6 senior public institutions and (2) the Board of Trustees of the University of Tennessee which exercises statutory authority for 4 senior institutions. In addition, the State Board of Education governs 4 postsecondary technical institutes which offer collegiate degrees.

Master Planning

The revised master plan for Tennessee addresses itself to the current status of state education as well as future prospects. Each of the governing boards in the state has revised its own role and scope statements as well as those of its institutions. The Tennessee Higher Education Commission has final documents ready for distribution.

1202 Commission

The Tennessee Higher Education Commission has been named as the Tennessee 1202 agency (February 1978), and will remain so as long as 1202 funds are available.

State Student Assistance and Loan Agencies

The Tennessee Student Assistance Corporation functions as the state student assistance agency and Tennessee participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

The Tennessee Council of Private Colleges serves as the organization for 39 private colleges and universities in the state and is recognized in the revised master plan.

Licensure/Approval Agencies

The Tennessee Higher Education Commission has approval and licensing authority for private degree-granting institutions. The Commission on Postsecondary Vocational Educational Institution Authorization has approval authority for vocational-technical institutions. The Higher Education Commission and the Commission on Vocational Education Institution Authorization have approval authority for proprietary schools. The Tennessee General Assembly passed legislation (March 1978) giving the THEC authority to license all out-of-state institutions, regardless of their accreditation or location.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The Statewide Review Committee for Postsecondary Vocational Technical Education provides articulation and communication among the educational segments in the area of vocational-technical programs.

TEXAS

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Coordinating Board, Texas College and University System was established in 1965 and serves as the statutory coordinating agency for postsecondary education in the state. Under law, the Coordinating Board has responsibility for central control and coordination of all public institutions of higher education in the state. The board is composed of 18 members representative of the general public who are appointed by the governor with senate confirmation for six-year overlapping terms. The board has statutory responsibility for approving or disapproving all degree programs and off-campus activities for public junior and senior colleges and universities. In the area of financial planning the board is directed to designate formulas for the use of the governor and Legislative Budget Board in their recommendations of legislative appropriations needed to finance public institutions of higher education. The board is responsible for authorizing elections to create public junior college districts and the adoption of standards for the operation of public junior colleges. The board also approves or disapproves most major new construction and repair and rehabilitation at public institutions. Texas does not have an office of secretary of education and the Coordinating Board does not function as a cabinet department. The executive officer of the board is appointed by the board and serves at its pleasure.

Institutional Governing Boards

There are now 47 public junior college districts in the state which operate 60 separate campuses. There are 15 statutory governing boards for senior institutions, 10 of which have responsibility for more than 1 institution and 5 for a single institution. Boards responsible for more than 1 institution and the number of institutions they govern are: (1) the University of Texas System -- 4 universities, 3 upper-level institutions, 3 health science centers, 1 medical branch and other research units; (2) Texas A&M University System -- 3 senior institutions, 1 medical school and 1 college of marine resources; (3) University System of South Texas -- 1 university and 2 upper-level institutions; (4) Texas Tech University -- 1 university and 1 medical school; (5) Texas State University System -- 4 universities and 1 upper-level center; (6) Lamar University -- 1 university and 2 lower-division centers; (7) East Texas State University -- 1 university and 1 upper-level center; (8) University of Houston System -- 2 universities and 2 upper-level institutions; (9) North Texas State University -- 1 university and 1 medical school; and (10) Pan American University -- 1 university and 1 upper-level institution. The boards of the following universities govern single institutions: Texas Southern, Midwestern State, Texas Woman's, West Texas State and Stephen F. Austin State Universities.

Master Planning

Informing the Future: A Plan for Higher Education for the Eighties, published by the Coordinating Board in 1981, contains recommendations to the governor and legislature for their consideration in higher education planning for the next decade. The Coordinating Board's original plan for higher education development, Challenge for Excellence, was published in 1968. A 1975 revision evaluated development in Texas postsecondary education since that time and projected needs to 1980. Texas Higher Education in Transition, published in 1978, contained further recommendations for higher education.

1202 Commission

In July 1976, the 1202 commission status was transferred to the Coordinating Board. To assist and advise the board in fulfilling its postsecondary education planning functions, an advisory committee with broad representation was appointed with a chairman, who is a member of the Coordinating Board, and 10 members. Five members are institution presidents and represent different types and levels of public and private institutions and the other 5 are the commissioner of education, the commissioner of higher education, the executive director of the Advisory Council for Technical-Vocational Education, the assistant administrator of the Texas Employment Commission and a representative of the Texas Student Association. Educational supply and occupational demand studies are published and updated periodically.

State Student Assistance and Loan Agencies

The Student Services Division of the Coordinating Board, Texas College and University System, serves as the state student assistance agency and the state participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

Educational Information Centers Program

The Educational Information Centers (EIC) program was authorized by the Educational Amendments of 1976, Public Law 94-482. The purpose of the EIC program is to provide educational information, guidance, counseling and referral services to all individuals in the states through centers located within a reasonable distance of all residents.

The Coordinating Board was designated in 1978 as the agency responsible for preparing the state EIC plan and administering the program. A planning grant application was submitted in 1978 to the Department of Health, Education and Welfare and $45,454 was awarded to the State of Texas to develop a State Plan for Educational Information Centers. Implementation of the plan began in 1979 and will continue commensurate with available funds.

State Board of Vocational Education

The State Board of Education, functioning ex officio as the State Board of Vocational Education, has responsibility for administration of programs relating to vocational-technical education in Texas' public community colleges, Texas State Technical Institute and other public postsecondary institutions. The Coordinating Board has coordinating responsibility for the community colleges within which post-

PART I: STATE STRUCTURE (CONTINUED)

State Board of Vocational Education (continued)

secondary vocational programs are offered. The Advisory Council for Technical-Vocational Education, with 21 citizen members, has wide-ranging advisory responsibilities including evaluation of programs, recommendations for the creation of new programs and curricula or improvement of existing efforts and recommendation of methods of funding vocational-technical programs.

State-Level Organization of Private Colleges and Universities

The Independent Colleges and Universities of Texas, Inc., serves as the state organization for 40 private colleges and universities.

Licensure/Approval Agencies

The Texas Education Agency has approval authority for vocational-technical and proprietary institutions. The Coordinating Board, Texas College and University System has approval and licensing authority for certain private degree-granting institutions.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The Advisory Council, a statutory body, is composed of 25 members including educators and administrators of vocational-technical education programs at the secondary and postsecondary level. The council makes recommendations for statewide coordination of vocational-technical education at public secondary and postsecondary institutions.

Institutions of Higher Education in Texas, 1980-81 (Fall Headcount Enrollments)	Coordinating Board, Texas College and University System
Postsecondary Educational Supply and Occupational Demand in Texas, Supplement to the 1978 Report, January 1980	Coordinating Board, Texas College and University System
Research Funds Report for Fiscal Year 1980	Coordinating Board, Texas College and University System
Rules and Regulations for Determining Residency Status and for Determining Tuition Rates for Foreign Students, July 20, 1979	Coordinating Board, Texas College and University System
Statistical Supplement to the Annual Report of the Coordinating Board, Texas College and University System, for Fiscal Year 1980	Coordinating Board, Texas College and University System
Texas Educational Opportunity Guide: Vital Information for Education and Work, Fall 1980	Coordinating Board, Texas College and University System

Section B: Special reports and studies completed from September 1979 to September 1980.

TITLE	PUBLICATION DATE	IS THIS AVAILABLE FOR DISTRIBUTION?	REQUESTED BY WHOM	AGENCY COMPLETING THE REPORT	ISSUES AND AREAS CONCERNED IN REPORT
Allied Health Education in Texas: Guiding Concepts for the Eighties	April 1980	Yes		Coordinating Board	Career mobility, continuing education and other issues in health education
Enrollment Projections, Texas Institutions of Higher Education, 1980-1990	July 1980	Yes		Coordinating Board	Forecasts for individual public senior colleges, aggregate figures for public community colleges and independent junior and senior institutions
Guidelines and Procedures for Statewide Review of Doctoral Programs	April 1980	Yes		Coordinating Board	Steps in the doctoral review process; factors and criteria to be examined in review of existing programs
Lost in the Index: A Report on the Effect of Inflation on Public Senior Colleges and Universities in Texas	March 1980	Yes		Coordinating Board	Impact of inflation on salaries, books and other goods and services based on Texas higher education price index developed for this study
Policy Guidelines for Statewide Academic Program Review	April 1980	Yes		Coordinating Board	Authority and purposes for review of all degree programs in Texas public senior colleges and universities, principles under which review will be conducted

PART III: CURRENT PUBLICATIONS AND REPORTS (CONTINUED)

Section B: Special reports and studies completed from September 1979 to September 1980. (continued)

TITLE	PUBLICATION DATE	IS THIS AVAILABLE FOR DISTRIBUTION?	REQUESTED BY WHOM	AGENCY COMPLETING THE REPORT	ISSUES AND AREAS CONCERNED IN REPORT
Space Use-Space Needs: A Study of the Availability and Use of Public Senior Higher Education Facilities in Texas	April 1980	Yes		Coordinating Board	Use of facilities at public senior colleges and universities; suggestion of systematic approach for assessing need for new construction
Study of Tuition Charges at Public Institutions of Higher Education	Aug. 1980	No	SCR 101 Committee on Higher Education Financing in Texas	Coordinating Board	Tuition charges in Texas and changes in student financial assistance

PART IV: SPECIAL STUDIES AND REPORTS CURRENTLY UNDERWAY OR PLANNED

Special reports and studies expected to be completed, underway or planned from September 1980 to September 1981.

TITLE	EXPECTED COMPLETION DATE	IS THIS AVAILABLE FOR DISTRIBUTION?	REQUESTED BY WHOM	AGENCY COMPLETING THE REPORT	ISSUES AND AREAS CONCERNED IN REPORT
Cable Franchise Study	Oct. 1981	Yes		Coordinating Board	Guidelines for institutions in securing cable television franchises
Faculty Compensation in Texas Public Colleges and Universities	Jan. 1981	Yes		Coordinating Board	Current salaries and benefits and recommendations to the legislature for increases in the 1982-83 biennium
Follow-Up Survey of May 1980 Graduates	Oct. 1980	No		Coordinating Board	Follow-up information on 1980 graduates earning baccalaureate, master's and doctoral degrees in major HEGIS disciplines
Informing the Future: A Plan for Higher Education for the Eighties	Jan. 1981	Yes		Coordinating Board	Trends in and recommendations for higher education development in the eighties
Informing the Future: Working Papers	Jan. 1981	Yes		Coordinating Board	In-depth studies of key issues in higher education

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The State Board of Regents, established in 1969 and amended in structure and responsibility in 1974, has statutory governing authority for a total of 9 public institutions: 4 senior, 3 junior and 2 vocational-technical. The board is composed of 16 members representing the general public and appointed by the governor with senate confirmation for six-year terms of office. A 17th member, the lieutenant governor, was added to the regents by the 1981 state legislature. The Board of Regents has statutory authority for coordinating and planning for all segments of postsecondary education (public junior and senior, vocational-technical, private and proprietary). In addition, the regents have program approval authority and authority to review institutional budgets and review and make consolidated budget recommendations for public senior and junior institutions. The state does not have an office of secretary of state and the Board of Regents is not a cabinet department. The executive officer of the board is appointed by the board and serves at the pleasure of the board.

Institutional Governing Boards

Utah does not have individual institutional governing boards, but has institutional councils, appointed by the governor with senate consent. The institutional councils have specific statutory authority, but derive their principal campus governance powers by delegation from the Board of Regents. The Utah system therefore combines central policy governance with the institutional councils which govern with presidents appointed by the regents and with powers delegated by the regents.

Master Planning

The regents have established a Committee on the Future to address major planning issues of the decade of the 80s.

1202 Commission

The Board of Regents has been designated by the governor as the 1202 commission for the state and was augmented by 3 members, 1 each representing private nonprofit institutions, vocational-technical institutions and the state manpower planning council.

State Student Assistance and Loan Agencies

The State Board of Regents serves as the state student assistance agency and the state participates in the federal state student incentive grant program. The state does have a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education. Less-than-baccalaureate occupational education programs exist in the area vocational schools under the jurisdiction of the State Board of Education.

State-Level Organization of Private Colleges and Universities

Utah does not have a state-level organization for private colleges and universities. The regents do have the obligation of seeking the cooperation of the private institutions.

Licensure/Approval Agencies

The State Board of Regents has approval authority for degree programs at the technical colleges. No approval and licensing agency exists for private degree-granting and proprietary schools.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The deans of education at the postsecondary institutions serve on a statewide committee to articulate education curricula and also to interrelate with elementary-secondary and postsecondary articulation. In addition, a Utah Systemwide Education Planning Commission has been working to address long-range planning issues for Utah public education, K-12 through graduate school.

UTAH

Utah's Career Guide	January 1981	Yes	State Board of Regents	State Board of Regents	A student guide for career counseling and academic/vocational advisement

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

There is no statutory or constitutional statewide postsecondary coordinating or planning agency in Vermont.

Institutional Governing Boards

Two institutional governing agencies exist in the state: (1) the Board of Trustees of the University of Vermont and State Agricultural College, which exercises statutory authority for that single institution; and (2) the Board of Trustees of the Vermont State Colleges, which exercises statutory authority for three senior colleges, a single two-year technical college and a statewide open noncampus community college. Each governing board submits budgets for its institutions to the governor for his consideration. He submits his recommendations on these budgets to the General Assembly, which makes appropriations for their support as it sees fit.

Master Planning

State planning is being conducted in stages. The first stage, the adoption of state goals for postsecondary education, has been completed. Providing student access to postsecondary education has been selected as the highest priority concern. A higher education funding study has been completed which analyzes and makes recommendations on higher education policy goals and operating principles to guide future funding decisions. Organization of regional councils to meet needs for adult postsecondary education has been recommended.

1202 Commission

The Vermont Higher Education Planning Commission was established by the governor as the postsecondary education commission for the state. The planning commission conducts planning and coordination as a matter of policy for all levels of postsecondary education (public senior and junior, vocational-technical, proprietary and private institutions). The commission consists of twelve members: 5 represent the general public including a student, 2 members without institutional affiliations, 1 member representing each house of the General Assembly; 5 represent public institutions and agencies, ex officio, including the president of the state university, the chancellor of the state colleges system, the director of the student assistance agency, the director of the state advisory council on vocational education and the commissioner of the state department of education; 2 represent private nonprofit institutions.

State Student Assistance and Loan Agencies

The Vermont Student Assistance Corporation is the state student assistance agency and participates in the federal state student incentive grant program. It has a federally-assisted guaranteed loan program.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education. All less-than-baccalaureate postsecondary occupational education programs fall under governing boards for institutions of higher education except for three schools for licensed practical nurses which are operated by the State Department of Education.

State-Level Organization of Private Colleges and Universities

There is a Vermont Foundation of Independent Colleges, which includes only the smaller private institutions and an Association of Vermont Independent Colleges.

Licensure/Approval Agencies

The State Board of Education serves as the licensing and approval authority for private institutions, and also authorizes the granting of degrees. Only nonprofit corporations may use the name college or university or be authorized to grant degrees. There is no approval authority for private vocational-technical institutions that do not grant degrees. The State Department of Education assists the Veterans Administration in approving programs for veterans' education.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

The Vermont Higher Education Council represents all accredited public and private institutions in the state and by statute advises the State Board of Education on the approval of private institutions and the authorization to grant degrees.

PART II: DESCRIPTIVE STATISTICS

VIRGINIA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The State Council of Higher Education, established in 1956 and most recently amended in structure and responsibility in 1974, serves as the statutory coordinating agency in the state. The council consists of 11 members appointed by the governor with confirmation by the legislature. All members represent the general public and serve four-year terms of office. The council has statutory responsibility for planning and coordination and program approval for public senior and junior institutions. The council has responsibility for the development of all budget guidelines and formulas. In addition, the council reviews institutional budgets and makes budget recommendations for all public institutions. Virginia has a statutory office of Secretary of Education established in 1972. The State Council of Higher Education is not a cabinet department and the executive officer of the council is appointed by and serves at the pleasure of the council.

Institutional Governing Boards

The State Board for Community Colleges has statutory authority for 23 public junior colleges under the coordination of the council. There are 13 other institutional governing boards in the state. The statutory boards are the Board of Visitors of Christopher Newport College, George Mason University, Longwood College, James Madison University, Mary Washington College, Old Dominion University, Radford University, Virginia Commonwealth University and the Virginia Military Institute. Norfolk State University, Virginia Polytechnic Institute and State University, and Virginia State University each have constitutional governing boards for single senior institutions. The Board of Visitors of the College of William and Mary has constitutional governing authority for one senior and one junior public institution. The Board of Visitors of the University of Virginia has statutory authority for two senior public institutions.

Master Planning

The council is statutorily charged with the responsibility for master planning. The first master plan was published in 1974 and updated in 1977; its most recent edition was published in two volumes in 1979. It will be published again in December 1981.

1202 Commission

In 1975 the governor designated the Council of Higher Education as Virginia's 1202 Commission. The council established a postsecondary advisory committee to assist it, and the council assumed the responsibilities of the Higher Education Facilities Commission. The designation was later (1977) statutorily confirmed.

State Student Assistance and Loan Agencies

The Council of Higher Education serves as the principal state student assistance agency and the state participates in the federal state student incentive grant program. The state has a state guaranteed loan program administered by the State Education Assistance Authority. The state also has a direct-loan program administered by the Virginia Education Loan Authority.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education. All less-than-baccalaureate occupational programs, including the area vocational schools designated as postsecondary, are within the planning and coordinating jurisdiction of the State Board of Education, the State Board for Community Colleges and the Council of Higher Education.

State-Level Organization of Private Colleges and Universities

The Council of Independent Colleges in Virginia serves as the organization (non-state) representing 25 private colleges and universities. The Council of Higher Education is statutorily charged with providing advisory services to the private institutions and with maintaining a Private College Advisory Committee.

Licensure/Approval Agencies

The State Council of Higher Education serves as the licensing and approval agency for private degree-granting institutions and for out-of-state institutions which operate in Virginia. The State Department of Education serves as the approval authority for vocational-technical and proprietary institutions which do not offer degrees.

Voluntary of Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

The State Advisory Committee on Teacher Education is made up of representatives from the State Department of Education, State Council of Higher Education, colleges, public schools and private citizens.

Statutory Advisory Committees and/or Task Forces

The Committee on Education for Health Professions and Occupations, appointed by the governor, makes recommendations to the State Council of Higher Education regarding adequate and coordinated educational programs for health-care personnel and conducts studies of educational needs in nursing and allied health professions. The Continuing Education Advisory Committee was established to assist the council in providing advisory services on academic and administrative matters to private colleges. The Postsecondary Education Advisory Committee provides the council with continuous advice and opinions from all segments of Virginia's postsecondary education community.

PART I: STATE STRUCTURE

State-Level Coordination and/or Governing Agency

The Council for Postsecondary Education has 16 members, including 9 public members appointed by the governor with senate confirmation. Statute requires that one of these public members be a student, serving up to three years. The remaining eight citizen members each serve six-year terms of office. Other members are: one representative each of the executive branch, four-year public institutions, independent institutions, and proprietary institutions; the director of the State Board for Community College Education; the superintendent of public instruction; and the director of the Commission for Vocational Education. The Council for Postsecondary Education has statutory responsibility for: (1) determining the educational needs of the state and identifying priorities among them; (2) specifying resources necessary to meet needs; (3) defining institutional roles and missions; (4) conducting budgetary reviews to determine conformity with the state plan and (5) reviewing university and college fee levels, admissions and transfer policies and new and existing degree programs. The state does not have an office of secretary of education and the council does not function as a cabinet department. The executive officer of the council is appointed by the council and serves at its pleasure.

Institutional Governing Boards

The State Board for Community College Education, created by the Community College Act of 1967, is the central administrative agency for the 27 public community colleges. Each of the state-supported community colleges also has its own local governing board. The district boards are responsible for the operation of the community colleges, determination of curricula (with state board review and approval), awarding of degrees and establishment of necessary local administrative rules and regulations, while the state board is responsible for policies covering concerns of a statewide nature (budget and funds allocations, standard policies and institutional locations). Each four-year public institution is governed by an individual statutory governing board -- the Boards of Trustees of Central Washington, Eastern Washington and Western Washington Universities, the Boards of Regents of the University of Washington and Washington State University and the Board of Trustees of the Evergreen State College.

Master Planning

The Council for Postsecondary Education in 1976 released its long-range plan, Policy and Planning Recommendations for Washington Postsecondary Education. This document addresses the full array of educational activities conducted in the state, including those offered in the proprietary sector and vocational-technical institutions. The report outlines both the assumptions upon which the plan is based and a design for its implementation and continuous review. Issues covered in the report include utilization of faculty resources, manpower planning and analysis, consumerism in postsecondary education and postsecondary education financing. Since its initial publication in 1976, the plan has been reviewed and updated twice, once in 1977 and again in 1978. The council will undertake a comprehensive revision of the plan during the 1981-83 biennium.

1202 Commission

Under the July 1975 statute, the Council for Postsecondary Education was designated the state 1202 commission.

State Student Assistance and Loan Agencies

The Council for Postsecondary Education serves as the state student assistance agency and administers five state programs of financial aid and the state's participation in the federal state student incentive grant program. In early 1979, a private nonprofit corporation, the Washington Student Loan Guaranty Association, was created to administer the federal guaranteed student loan program.

State Board of Vocational Education

The Commission for Vocational Education serves as the State Board of Vocational Education. It is responsible for the state's vocational education plan prepared in compliance with federal requirements and for adjudication between the vocational-technical institutes under the K-12 system and the vocational programs in the community colleges. Five vocational-technical institutes are under the jurisdiction of the state superintendent of public instruction.

State-Level Organization of Private Colleges and Universities

The Washington Friends of Higher Education and the Independent Colleges of Washington serve as the state-level voluntary organizations for the private colleges and universities.

Licensure/Approval Agencies

The Council for Postsecondary Education administers the regulations implementing the Educational Services Registration Act for nonaccredited degree-granting institutions. Private, nonaccredited vocational schools are registered by the Commission for Vocational Education.

Voluntary or Statutory Committees for Articulation, Communication, etc., Between Elementary-Secondary and Postsecondary Education

A representative from the Washington Council for Postsecondary Education participates in two statewide voluntary articulation bodies: the Washington Council on High School-College Relations and the Intercollege Relations Commission.

WEST VIRGINIA

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Regents, established in 1969 and amended in structure and responsibility in 1981, serves as the statutory governing authority for a total of 15 public institutions in the state: 3 community colleges and 12 senior colleges. The board is composed of 12 members, 9 appointed by the governor with senate confirmation, 1 member serving in an ex officio capacity and the chairpersons of the faculty and student advisory councils. Nine members represent the general public and all serve six-year terms of office. The board has statutory responsibility for planning and coordination for public junior and senior institutions. In addition, the board has statutory responsibility for program approval, institutional budget review and making consolidated budget recommendations for public senior and junior institutions. The state does not have an office of secretary of education and the board does not function as a cabinet department. The executive officer of the board is appointed by the board and serves at the pleasure of the board.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

The master planning document was completed in fall 1979 and has been widely distributed.

1202 Commission

The Board of Regents has been designated by the governor as the 1202 commission. The board was augmented to include 3 representatives of public vocational-technical institutions (chairman of state Advisory Council on Vocational Education and 2 members of the State Board of Education), 2 representatives of private nonprofit institutions and 1 member representing proprietary schools.

State Student Assistance and Loan Agencies

The West Virginia Board of Regents serves as the state student assistance agency and the state participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education. Less-than-baccalaureate occupational education programs are offered both in area vocational schools under the jurisdiction of the State Board of Education and in institutions under the jurisdiction of the Board of Regents.

State-Level Organization of Private Colleges and Universities

The West Virginia Association of Private Colleges serves as the organization for 9 private colleges and universities in the state.

Licensure/Approval Agencies

The Board of Regents has approval and licensing authority for private degree-granting institutions. The Department of Education has approval authority for vocational-technical and proprietary institutions.

Statutory Advisory Committees and/or Task Forces

Two advisory committees to the Board of Regents have been established by statute -- the Advisory Council of Faculty and the Advisory Council of Students.

WISCONSIN

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

The Board of Regents of the University of Wisconsin System, established in 1971 and amended in structure and function in 1973 and 1974, serves as the statutory governing agency for public institutions: 13 senior and 13 freshman-sophomore liberal arts centers. The board consists of 16 members serving 7-year terms of office -- 14 members are appointed by the governor with senate confirmation and 2 members serve in an ex officio capacity. The board has statutory responsibility for planning and coordination, program approval, institutional budget review and making consolidated budget recommendations for all units of the University of Wisconsin System. The president of the University System is appointed by the Board of Regents and serves at the pleasure of the board. The state has an Education Advisory Council to advise and counsel the governor and includes representatives of the University System, the Board of Vocational, Technical and Adult Education, the Higher Educational Aids Board, the Governor's Employment and Training Office, the Wisconsin Association of Non-Public Schools, the Educational Communications Board, the State Department of Public Instruction, the State Department of Administration, the Wisconsin Council of Independent Education and the Wisconsin Association of Independent Colleges and Universities. The governor has designated the Education Advisory Council as the State Postsecondary Education Commission (1202 commission).

The Wisconsin Board of Vocational, Technical and Adult Education is composed of 12 members: 3 employers, 3 employees and 3 members at large appointed by the governor and ratified by the senate for six-year terms. The president of the Board of Regents, the superintendent of the Department of Public Instruction and the commissioner of the Department of Industry, Labor and Human Relations serve as ex officio members. The state is divided into 16 vocational, technical and adult education districts, which include 36 technical-vocational institutions, 3 of which offer a lower-division program. The agency is charged with the statutory mission of providing programs in vocational, technical and adult short-term and apprenticeship programs below the baccalaureate degree. The board has statutory responsibility for planning, coordinating, program approval and evaluation and the disbursement and accountability for state and federal funds.

Institutional Governing Boards

See State-Level Coordinating and/or Governing Agency above.

Master Planning

Master planning for higher education in Wisconsin is the responsibility of the Board of Regents of the University of Wisconsin System and the State Board of Vocational, Technical and Adult Education for their respective systems. Planning is coordinated through joint committees and membership of the board presidents on both boards. In particular areas, master planning is done by task forces with members drawn from public and private higher education institutions and from practicing professionals in the field.

State Student Assistance and Loan Agencies

The State of Wisconsin Higher Educational Aids Board serves as the state student assistance agency and the state participates in the federal state student incentive grant program. The state has a state guaranteed loan program under the federal insured loan program.

State Board of Vocational Education

The State Board of Vocational, Technical and Adult Education is the State Board of Vocational Education (see State-Level Coordinating and/or Governing Agency).

State-Level Organization of Private Colleges and Universities

The Wisconsin Association of Independent Colleges and Universities serves as the organization for 18 private colleges and universities in the state.

Licensure/Approval Agencies

Wisconsin does not have a designated approval and licensing authority for private degree-granting institutions. The Educational Approval Board serves as the licensing and approval agency for proprietary schools in the state and the State Board of Vocational, Technical and Adult Education has approval authority for vocational-technical institutions. The Educational Approval Board is attached to the Board of Vocational, Technical and Adult Education for administrative purposes.

Related Nongovernmental Organizations With Staffs and Programs -- Representing Both Public and Private Institutions

Although not formally staffed, the Wisconsin Association of Higher Education meets twice a year to discuss issues of higher education and is composed of the presidents and chancellors of public and private institutions in the state.

Statutory Advisory Committees and/or Task Forces

The Council on Financial Aid was established to advise the Higher Educational Aids Board on student assistance matters.

WYOMING

PART I: STATE STRUCTURE

State-Level Coordinating and/or Governing Agency

Wyoming has no state level coordination and governing board which has oversight responsibility or authority over all levels of postsecondary education.

Institutional Governing Boards

There are 2 institutional governing boards in the state--the Community College Commission with statutory authority for 7 community colleges and the Board of Trustees of the University of Wyoming with constitutional governing authority for that single institution. Each community college is administered locally by an elected board of trustees.

Master Planning

The Joint Subcommittee on Postsecondary Education published an inventory/status report on postsecondary education in February 1980. Primary long-range planning lies with the several institutions.

1202 Commission

Established by gubernatorial directive in 1979, this group has essentially dissolved with elimination of federal funding in 1982. Though a joint subcommittee representing the community colleges and the University of Wyoming will continue to meet, it will most likely not act as a 1202 commission, at least until such time as a new federal/state agreement on higher education is established.

State Student Assistance and Loan Agencies

The Community College Commission administers the state's participation in the federal state student incentive grant program. Wyoming has established a guaranteed student loan program which operates within the Wyoming Higher Education Assistance Foundation. No state level student aid programs are operated as a part of state government.

State Board of Vocational Education

The State Board of Education is the State Board of Vocational Education.

State-Level Organization of Private Colleges and Universities

There are no private nonprofit degree-granting institutions in Wyoming, however, several institutions have expressed interest in establishing programs in the state.

Licensure/Approval Agencies

The State Department of Education serves as the licensing and approval authority for proprietary institutions. The licensing and certification services unit serves as the approval authority for vocational-technical and proprietary institutions

WYOMING

PART II: DESCRIPTIVE STATISTICS

APPENDIX A

Data Sources and References for Part II Descriptive Statistics

Table I. State Population, Size and Trends 1979

Population - 1973 and 1979

Source: U.S. Bureau of the Census, Current Population Report, Series P-25, No. 875 and unpublished data.

The estimates for ages 5-13, 14-17, and 18-24 are based on unpublished U.S. Bureau of the Census data. It must be stressed that estimates for narrow age ranges are subject to larger estimating errors than broader age groups. This is particularly true for the age group 18-24, which is a highly mobile group and therefore difficult to estimate.

These figures have been included in these state profiles to provide some measure of the relative size differences among the states as well as the extent to which this population base is growing or contracting.

Table II. State and Local Financial Base 1979

Personal Income/Capita - 1979

Source: U.S. Department of Commerce, Bureau of Economic Analysis, Survey of Current Business, Volume 61, Number 4, April 1981.

This measure is included to provide one indication of the relative wealth of the states.

Tax Revenues/Capita - 1979
State and Local Tax Capacity - 1979
Tax Effort - 1979

Source: D. Kent Halstead, pre-published figures. Will be published in "Advisory Commission on Intergovernmental Relations," NIE.

These measures are intended to reflect the relative capacities of state and local governments to raise monies to support public programs and the relative extent to which states have actually utilized their capacities to raise taxes.

Table III. State and Local Spending 1979

State and Local Expenditures - 1979

Source: Governmental Finances in 1978-79, U.S. Department of Commerce, Bureau of the Census, Goverment Finances, GF79, No. 5. (U.S. GPO, Washington, D.C.). Table 13 for total expenditures; education: local schools total, and education: institutions of higher education.

It should be noted that these expenditure figures include both capital and operation outlays. This is in contrast to the postsecondary education support data in Table IV, which represents only operating expenditures of postsecondary institutions. These figures on governmental expenditures have been included to provide some relative measure of the overall level of state and local expenditures as well as their differing distribution to education at all levels.

Table IV. State and Local Spending on Higher Education 1979

Special Note on Institutions Included: The percent change between 1978 and 1979 was computed for only those institutions reporting data in both 1978 and 1979. The institutional classification code assigned in 1978-79 was used. In other words, for any institution changing categories between 1978 and 1979, the 1979 categories were used for the percent change.

General Institutional Appropriations - 1979

Source: Tapes furnished by the National Center for Education Statistics (NCES), HEGIS Series, "Financial Statistics of Institutions of Higher Education for Fiscal Year Ending 1979."

Includes dollars from state and local sources for educational and general appropriations. Referencing the HEGIS Survey form on finances, this includes in Part A, the sum of lines 3 and 4. These figures exclude state and local contracts and grants. Tuition and fees collected by the institution and returned to the institution in the form of appropriations (that is, reappropriated tuition and fees) should have been subtracted as they are already reported under tuition and fees.

Student Enrollments - Fall 1978 A77-78 FIN78

Source: Tapes furnished by the National Center for Education Statistics (NCES), HEGIS Series, "Opening Fall Enrollment in Higher Education, 1978."

Enrollment figures are based on the sum of the full-time men plus the full-time women plus an FTE of part-time students (as reported by institutions)--i.e., line 10, columns 1 + 3 + 6 on the survey form. Because fall enrollments may not be representative of full-year enrollments and because enrollment counting procedures differ among institutions and states, readers are cautioned in the relative interpretations they may make.

Student Financial Aid 1978-79

Source: Jane N. Ryland, Report of the Ad-Hoc Task Force on the Quality and Comparability of HEGIS Finance Data. (Boulder, Colo: SHEEO/NCES Communications Network, 1981.) Student Financial Aid 1978-79.

These data represent state direct student aid (not in HEGIS) and include funds appropriated and expended through acts of state and local governments for outright scholarship grants, fellowship stipends, and work-study support to individuals enrolled in formal postsecondary course work, either for credit or not, but only funds provided directly to students, and not as part of the state's appropriations to institutions.

Survey instructions specified inclusion of both merit (including athletic and music scholarships) and need-based awards, awards to undergraduate and graduate students, awards to students attending proprietary institutions, awards to students attending out-of-state institutions (i.e., portable aid), and only the state-funded portion of the SSIG.

The following were to be excluded. Funds for student aid that are appropriated directly to postsecondary institutions, federal funds for SSIG, and state funding of student loans (capitalization or loan defaults).

Table V. Institutional Revenues 1979

Total Education and General Revenues per FTE Student 1979

Source: NCES tapes of data from a survey of "Financial Statistics of Institutions of Higher Education for Fiscal Year Ending 1979," Part A, Sum of lines 1-15 and line 18.

Educational and general revenues are defined to include tuition and fees; governmental appropriations; government grants and contracts; private gifts, grants and contracts; endowment income; sales and service of educational activities and other sources. It excludes revenues from sales and services of auxiliary enterprises, sales and services of hospitals, and independent operations. The FTE student figures are the same as those used in Table IV. Because fall enrollments may not be representative of full-year enrollments and because enrollment counting procedures differ among institutions and states, readers are cautioned in the relative interpretations they may make.

Each revenue source is divided by total educational and general revenues.

% tuition and fees - Part A, line 1
% state appropriations - Part A, line 3
% local appropriations - Part A, line 4
% federal appropriations, grants and contracts - Part A, lines 1, 5, 6
% other gifts, grants and contracts - Part A, lines 7, 8, 9, 10, 11, 12
% endowment income - Part A, lines 13, 14
% other - Part A, lines 15, 18

Table VI. Institutinal Expenditures 1979

Total Educational and General Expenditures per FTE Student 1979

Source: NCES tapes of data based on the HEGIS survey of "Financial Statistics of Institutions of Higher Education for Fiscal Year Ending 1979," Part B, line 12.

Educational and general expenditures include current fund expenditures for instruction, research, public service, academic support, student services, institutional support, operation and maintenance of plant, scholarships and fellowships, and educational and general mandatory transfers. Educational and general expenditures exclude expenditures for auxiliary enterprises, hospitals and independent operations. The FTE student figures are the same as that used in Table IV. Because fall enrollments may not be representative of full-year enrollments and because enrollment counting procedures differ among institutions and states, readers are cautioned in the relative interpretations they may make.

Each expenditure source is divided by total educational and general expenditures.

% instruction - Part B, line 1
% research - Part B, line 2
% public service - Part B, line 3
% academic support - Part B, line 4
% student services - Part B, line 6
% institutional support and plant maintenance - Part B, lines 7, 8
% scholarships and fellowships - Part B, lines 9, 10
% educational and general mandatory transfers - Part B, line 11

Table VII. Faculty Characteristics 1979-80

Average Faculty Salaries 1979-80

Source: Tapes furnished by NCES based on their HEGIS Survey, "Employees in Institutions of Higher Education 1979-80," Part 1, Sections A and B, columns 1 and 6. Total salary outlay is reported for instructional faculty on 9-10 month salary contracts and 11-12 month salary contracts. Part-time faculty are not included. Staff benefits are also excluded.

% of Faculty Tenured 1979-80

Source: Tapes furnished by NCES based on their HEGIS Survey, "Employees in Institutions of Higher Education 1979-80," Part 1, Sections A and B, columns 3 and 7.

Number of instructional faculty with tenure is reported for instructional faculty on 9-10 month salary contracts and 11-12 month salary contracts. Part-time faculty are not included.

Table VIII. Student Demand and Enrollment Trends

Student Enrollment (FTE) as a Proportion of Total (FTE) Enrollment, Full-Time Headcount, and Part-Time Headcount, 1978-79

Source: Tapes furnished by NCES based on their HEGIS Survey, "Opening Fall Enrollment in Higher Education, 1978." The FTE student figures are the same as that used in Table IV. Because fall enrollments may not be representative of full-year enrollments and because enrollment counting procedures differ among institutions and states, readers are cautioned in the relative interpretations they may make.

FTE enrollment at public postsecondary institutions is divided by total FTE enrollments at all institutions (public and private) and FTE enrollment at private postsecondary institutions is divided by total FTE enrollments at all institutions (public and private).

The proportion represents a relative measure of the extent to which postsecondary education is public or private in the state.

Table IX. Student Tuition and Fees 1979-80

Tuition and Fees Charged Per Typical Full-Time Student 1979-80

Source: Tapes furnished by NCES based on their HEGIS Survey, "Institutional Characteristics of Colleges and Universities 1979-80," Part 33, Basic Student Changes for Academic Year 1978-79, lines 1-6. The figures reported are simple unweighted averages.

SPECIAL NOTE

The institutional classification system has been developed at NCHEMS for cross-sectional analysis of institutional data. Institutions are classified based on their program characteristics: the number of programs offered by level and the number of degree recipients by level of type of program. Each category is briefly defined below.

APPENDIX B

U.S. AVERAGES

PART II: DESCRIPTIVE STATISTICS

I. STATE POPULATION SIZE AND TRENDS 1979 (Census Data)

	1979 Population Estimate (000's)	% Change Since 1973
TOTAL	220,105	5
BY AGE GROUPS		
under 5..........	15,647	-4
5-13 yrs. old....	30,650	-9
14-17 yrs. old...	16,277	-4
18-24 yrs. old...	29,033	12
25-44 yrs. old...	59,937	18
45-64 yrs. old...	43,902	2
65 and over......	24,659	19

II. STATE AND LOCAL FINANCIAL BASE 1979 (Primarily Census Data)

Personal income/capita (1979) ...... $	8,757
Tax revenue/capita (1979) .... $	934
State and local tax capacity (U.S. avg. 100) 1978	100
Tax effort (U.S. avg. 100) 1978	100

III. STATE AND LOCAL SPENDING 1979 (Census Data)

State and local expenditures, 1979	Column 1 Per Capita '79	% change Column 1 since '78	Related State Rank (High to Low)	Column 4 Per $1000 Personal Income '76	% change Column 4 Since '78	Related State Rank (High to Low)
General expenditures (total) .... $	1,481	9%		169	0%	
Elementary and secondary education expenditures	379	8		43	-1	
Higher education expenditures	137	5		16	-4	

IV. STATE AND LOCAL SPENDING ON HIGHER EDUCATION 1979 (NCES Data)
